

NCI Adult In-Person Survey and NCI-AD Adult Consumer Survey: Crosswalk of Matching 2018-2019 Indicators

This document provides information on matching indicators that align between the National Core Indicators™ (NCI) Adult In-Person Survey© (IPS) (for the IDD population) and the National Core Indicators for Aging and Disabilities™ (NCI-AD) Adult Consumer Survey©.

NCI and NCI-AD Indicators are standard measures used across states to assess the outcomes of long-term services provided to individuals. Indicators are organized into “Domains”, or broad areas of concern. NCI-AD domains largely match NCI domains; many of the indicators within domains also align across the surveys.

Crosswalk of matching NCI and NCI-AD indicators

NCI Domain	NCI Indicator	NCI-AD Indicator	NCI-AD Domain
Work	<i>Proportion of people who have a paid job in the community</i>	<i>Proportion of people who have a paid job</i>	Work
	<i>Proportion of people who do not have a job in the community but would like to have one</i>	<i>Proportion of people who would like a job</i>
