# NCl-AD <br> NATIONAL CORE INDICATORS Aging and Disabilities ${ }^{m}$ 

## National Core Indicators

Aging and Disability Adult Consumer Survey

## 2015-2016 Kansas Results

## Preface

The State of Kansas has a number of publicly funded long term services and supports (LTSS) available to older adults and adults with physical disabilities who have significant health care needs. LTSS provide a wide array of health and social supports that enable these individuals to avoid placement in facilities and to live in a setting of their choice. Specifically, the Kansas Department for Health and Environment (KDHE) administers Medicaid funding for LTSS that provides a variety of program options in both facility based and home and community based services (HCBS) settings. The Kansas Department for Aging and Disability Services (KDADS) oversees and administers the Medicaid waiver programs. KDADS administers the funding from the federal Older Americans Act and State Funding for Senior Care Act Services making additional supports and services available to help older adults remain in the community of their choice.

Because our population is rapidly becoming older and more diverse, this is a particularly critical time for Kansas to assess the quality and impact of its existing long term services and supports. An element that cuts across all parts of Kansas' LTSS system is the importance of measuring quality and reporting the results to stakeholders. Participation in the National Core Indicators- Aging and Disability (NCI-AD) survey continues Kansas' efforts to evaluate the quality of life and quality of services that persons receive. Over the next decade, Kansas will experience a demographic shift that will create new demands for the LTSS system. The findings from the NCI-AD are crucial information for Kansas to better understand and support the growing and shifting population.

This report highlights the results for Kansas from its first NCI-AD Adult Consumer Survey. State departments and planning groups can utilize this information to make improvements in programs and services, and more effectively meet the needs of older adults and adults with physical disabilities who have significant health care needs.

Tim Keck, Acting Secretary
Kansas Department for Aging and Disability Services

## List of Abbreviations Used in This Report

ADRC - Aging and Disability Resource Centers
CIL - Centers for Independent Living
CMS - Centers for Medicare \& Medicaid Services
HCBS - Home and Community Based Services
HSRI - Human Services Research Institute
ID/DD - Intellectual/Developmental Disability
FE - Frail Elderly
MCO - Managed Care Organization
MFP - Money Follows the Person
N - Number of respondents
NASDDDS - National Association of State Directors of Developmental Disabilities Services
NASUAD - National Association of States United for Aging and Disabilities
OAA - Older Americans Act
PACE - Programs of All-Inclusive Care for the Elderly
PD Medicaid Program - Physical Disability Medicaid Program
QOL - Quality of Life
QMS- Quality Management Specialist
SCA- Senior Care Act
TBI/ABI - Traumatic/Acquired Brain Injury

## Table of Contents

Preface ..... 3
List of Abbreviations Used in This Report ..... 5
Table of Contents ..... 6
What is NCI-AD? ..... 28
$\mathrm{NCI}-\mathrm{AD}$ Survey ..... 28
Survey Overview ..... 28
Figure 1. NCI-AD Domains and indicators ..... 29
Organization of the Survey ..... 31
NCI-AD in Kansas ..... 32
Sample ..... 33
Figure 2. Programs included, number of surveys, and margins of error ..... 35
Survey Process ..... 36
Stakeholders ..... 36
Organization of Results ..... 37
Limitations of Data ..... 38
Community Participation ..... 39
Graph 1. Proportion of people who are able to do things they enjoy outside of their home when and with whom they want to.40
Choice and Decision Making ..... 41
Graph 2. Proportion of people who are able to choose their roommate (if in group setting) ..... 42
Graph 3. Proportion of people who get up and go to bed at the time when they want ..... 42
Graph 4. Proportion of people who can eat their meals when they want ..... 43
Graph 5. Proportion of people who are able to decide how to furnish and decorate their room (if in group setting) ..... 43
Relationships ..... 44
Graph 6. Proportion of people who can always or almost always see or talk to friends and family when they want to (if there are friends and family who do not live with person) ..... 45
Graph 7. Proportion of people who sometimes or often feel lonely, sad or depressed ..... 45
Satisfaction ..... 46
Graph 8. Proportion of people who like where they are living ..... 47
Graph 9. Proportion of people who would prefer to live somewhere else ..... 47
Graph 10. Proportion of people who like how they usually spend their time during the day ..... 48
Graph 11. Proportion of people whose paid support staff change too often ..... 48
Graph 12. Proportion of people whose paid support staff do things the way they want them done ..... 49
Service Coordination ..... 50
Graph 13. Proportion of people who know whom to call if they have a complaint about their services ..... 51
Graph 14. Proportion of people who know whom to call to get information if their needs change and they need new or different types of services and supports ..... 51
Graph 15. Proportion of people who can reach their case manager/care coordinator when they need to (if know they have case manager/care coordinator) ..... 52
Graph 16. Proportion of people whose paid support staff show up and leave when they are supposed to ..... 52
Graph 17. Proportion of people who have an emergency plan in place ..... 53
Graph 18. Proportion of people who want help planning for their future need for services ..... 53
Graph 19. Proportion of people whose services meet all their needs and goals ..... 54
Graph 20. Proportion of people whose case manager/care coordinator talked to them about services that might help with unmet needs and goals (if have case manager and have unmet needs and goals) ..... 54
Graph 21. Proportion of people whose family member (unpaid or paid) is the person who helps them most often ..... 55
Graph 22. Proportion of people whose family member (unpaid or paid) provides additional assistance ..... 55
Care Coordination ..... 56
Graph 23. Proportion of people who stayed overnight in a hospital or rehabilitation facility (and were discharged to go home) in past year. ..... 57
Graph 24. Proportion of people who reported feeling comfortable and supported enough to go home after being discharged from a hospital or rehabilitation facility (if occurred in the past year) ..... 57
Graph 25. Proportion of people who reported someone followed-up with them after discharge from a hospital or rehabilitation facility (if occurred in the past year) ..... 58
Graph 26. Proportion of people who reported having one or more chronic condition(s) ..... 58
Graph 27. Proportion of people who reported know how to manage their chronic condition(s) ..... 59
Access. ..... 60
Graph 28. Proportion of people who have transportation when they want to do things outside of their home ..... 61
Graph 29. Proportion of people who have transportation to get to medical appointments when they need to ..... 61
Graph 30. Proportion of people who receive information about their services in the language they prefer (if non-English) ..... 62
Graph 31. Proportion of people who need new grab bars in the bathroom or elsewhere in home ..... 62
Graph 32. Proportion of people who need an upgrade to grab bars in the bathroom or elsewhere in home ..... 63
Graph 33. Proportion of people who need new bathroom modifications (other than grab bars) ..... 63
Graph 34. Proportion of people who need an upgrade to bathroom modifications (other than grab bars) ..... 64
Graph 35. Proportion of people who need a new specialized bed ..... 64
Graph 36. Proportion of people who need an upgrade to specialized bed ..... 65
Graph 37. Proportion of people who need a new ramp or stair lift in or outside the home ..... 65
Graph 38. Proportion of people who need an upgrade to a ramp or stair lift in or outside the home ..... 66
Graph 39. Proportion of people who need a new remote monitoring system. ..... 66
Graph 40. Proportion of people who need an upgrade to remote monitoring system ..... 67
Graph 41. Proportion of people who need a new emergency response system ..... 67
Graph 42. Proportion of people who need an upgrade to emergency response system ..... 68
Graph 43. Proportion of people who need new other home modifications ..... 68
Graph 44. Proportion of people who need an upgrade to other home modifications ..... 69
Graph 45. Proportion of people who need a new walker ..... 69
Graph 46. Proportion of people who need an upgrade to a walker ..... 70
Graph 47. Proportion of people who need a new scooter ..... 70
Graph 48. Proportion of people who need an upgrade to a scooter ..... 71
Graph 49. Proportion of people who need a new cane ..... 71
Graph 50. Proportion of people who need an upgrade to a cane ..... 72
Graph 51. Proportion of people who need a new wheelchair ..... 72
Graph 52. Proportion of people who need an upgrade to a wheelchair ..... 73
Graph 53. Proportion of people who need new hearing aids ..... 73
Graph 54. Proportion of people who need an upgrade to hearing aids ..... 74
Graph 55. Proportion of people who need new glasses ..... 74
Graph 56. Proportion of people who need an upgrade to glasses. ..... 75
Graph 57. Proportion of people who need a new communication device ..... 75
Graph 58. Proportion of people who need an upgrade to a communication device ..... 76
Graph 59. Proportion of people who need new portable oxygen ..... 76
Graph 60. Proportion of people who need an upgrade to portable oxygen ..... 77
Graph 61. Proportion of people who need new other assistive device ..... 77
Graph 62. Proportion of people who need an upgrade to other assistive device ..... 78
Safety ..... 79
Graph 63. Proportion of people who feel safe at home ..... 80
Graph 64. Proportion of people who feel safe around their paid support staff ..... 80
Graph 65. Proportion of people who are ever worried for the security of their personal belongings ..... 81
Graph 66. Proportion of people whose money was taken or used without their permission ..... 81
Graph 67. Proportion of people who have concerns about falling or being unstable (or about whom there are concerns) ..... 82
Graph 68. Proportion of people with whom somebody talked to or worked with to reduce risk of falling or being unstable (if there are such concerns) ..... 82
Graph 69. Proportion of people who are able to get to safety quickly in case of an emergency like a fire or a natural disaster .. ..... 83
Health Care ..... 84
Graph 70. Proportion of people who have gone to the emergency room for tooth or mouth pain in past year ..... 85
Graph 71. Proportion of people who have gone to the emergency room for falling or losing balance in past year ..... 85
Graph 72. Proportion of people who have gone to the emergency room in past year (for reasons other than tooth/mouth pain or falling/losing balance) ..... 86
Graph 73. Proportion of people who have a primary care doctor. ..... 86
Graph 74. Proportion of people who can get an appointment to see their primary care doctor when they need to ..... 87
Graph 75. Proportion of people who have talked to someone about feeling sad and depressed during the past 12 months (if feeling sad and depressed) ..... 87
Graph 76. Proportion of people who have had a physical exam or wellness visit in the past year ..... 88
Graph 77. Proportion of people who have had a hearing exam in the past year ..... 88
Graph 78. Proportion of people who have had a vision exam in the past year ..... 89
Graph 79. Proportion of people who have had a flu shot in the past year ..... 89
Graph 80. Proportion of people who have had a routine dental visit in the past year ..... 90
Graph 81. Proportion of people who have had a cholesterol screening done by a doctor or nurse in the past five years ..... 90
Wellness ..... 91
Graph 82. Proportion of people who describe their overall health as poor ..... 92
Graph 83. Proportion of people who reported their health is much better or somewhat better compared to 12 months ago ..... 92
Graph 84. Proportion of people who reported they forget things more often than before during the past 12 months ..... 93
Graph 85. Proportion of people who have discussed (or somebody else discussed) their forgetting things with a doctor or a nurse (if forget things more often during the past 12 months) ..... 93
Medications ..... 94
Graph 86. Proportion of people who take medications that help them feel less sad or depressed ..... 95
Graph 87. Proportion of people who take or are supposed to take any prescription medications ..... 95
Graph 88. Proportion of people who understand why they take their prescription medications and what they are for (if take or are supposed to take prescription medications) ..... 96
Rights and Respect ..... 97
Graph 89. Proportion of people who feel that their paid support staff treat them with respect ..... 98
Graph 90. Proportion of people who report that others ask permission before entering their home/room ..... 98
Graph 91. Proportion of people who are able to lock the doors to their room if they want to (if in group setting) ..... 99
Graph 92. Proportion of people who have enough privacy in their home (if in group setting) ..... 99
Graph 93. Proportion of people who are able to have visitors come at any time (if in group setting) ..... 100
Graph 94. Proportion of people who have privacy with visitors at home if they want it (if in group setting) ..... 100
Graph 95. Proportion of people who can use the phone privately whenever they want to (if in group setting) ..... 101
Graph 96. Proportion of people who have access to food at all times of the day (if in group setting) ..... 101
Graph 97. Proportion of people whose mail or email is read without asking them first (if in group setting) ..... 102
Self-Direction of Care ..... 103
Graph 98. Proportion of people who are participating in a self-directed supports option (as defined by their State—data for this indicator come directly from State administrative records) ..... 104
Graph 99. Proportion of people who can choose or change what kind of services they get and determine how often and when they get them ..... 104
Graph 100. Proportion of people who can choose or change who provides their services if they want to ..... 105
Work ..... 106
Graph 101. Proportion of people who have a paying job in the community, either full-time or part-time ..... 107
Graph 102. Proportion of people who would like a job (if not currently employed) ..... 107
Graph 103. Proportion of people who reported that someone has talked to them about job options (if wanted a job) ..... 108
Graph 104. Proportion of people who do volunteer work ..... 108
Everyday Living ..... 109
Graph 105. Proportion of people who generally need a lot or some assistance with everyday activities (things like preparing meals, housework, shopping or taking their medications) ..... 110
Graph 106. Proportion of people who always get enough assistance with everyday activities when they need it (if need any assistance) (things like preparing meals, housework, shopping or taking their medications) ..... 110
Graph 107. Proportion of people who generally need a lot or some assistance for self-care (things like bathing, dressing, going to the bathroom, eating, or moving around their home) ..... 111
Graph 108. Proportion of people who always get enough assistance with self-care when they need it (if need any assistance) (things like bathing, dressing, going to the bathroom, eating, or moving around their home) ..... 111
Graph 109. Proportion of people who have access to healthy foods like fruits and vegetables when they want them ..... 112
Affordability ..... 113
Graph 110. Proportion of people who ever have to skip a meal due to financial worries ..... 114
Planning for future ..... 115
Graph 111. Proportion of people who want help planning for their future need for services ..... 116
Control ..... 117
Graph 112. Proportion of people who feel in control of their life ..... 118

## What is NCI-AD?

The National Core Indicators for Aging and Disabilities© (NCI-AD) are standard measures used across participating states to assess the quality of life and outcomes of seniors and adults with physical disabilities-including traumatic or acquired brained injury (TBI/ABI) - who are accessing publicly-funded services through Medicaid, the Older Americans Act, skilled nursing facilities/nursing homes, and/or state-funded programs. The effort is coordinated by the National Association of States United for Aging and Disabilities ${ }^{1}$ (NASUAD) and Human Services Research Institute (HSRI). Data for the project are gathered through a yearly in-person Adult Consumer Survey administered by state Aging, Disability, and Medicaid Agencies to a sample of at least 400 individuals in each participating state. Indicators address key areas of concern such as service and care coordination, community participation, choice and decision making, employment, rights and respect, health care and safety. NCI-AD data measure the performance of state long term services and supports (LTSS) systems and help state agencies with quality improvement initiatives, strategic planning, and legislative and funding prioritization. The project officially launched in mid- 2015 with 13 participating states ${ }^{2}$. For more on the development and history of NCI-AD, refer to the National Core Indicators Aging and Disability Adult Consumer Survey Mid-Year Results 2015-2016: Shortened Data Collection Cycle.

## NCI-AD Survey

## Survey Overview

The NCI-AD Adult Consumer Survey is designed to measure approximately 50 core indicators. Indicators are the standard measures used across states to assess the outcomes of services provided to individuals. Indicators are organized across eighteen broader domains and address key areas of concern, including employment, respect/rights, service coordination, care coordination, choice,

[^0]and health and safety. An example of an indicator around Service Coordination is: "Proportion of people who receive the services that they need."

While most indicators correspond to a single survey question, a few refer to clusters of related questions. For example, the Access indicator that measures "Proportion of people who get needed equipment, assistive devices" is measured by several survey questions that ask about the person's need for various equipment and devices. The following Figure 1 details NCI-AD domains and corresponding indicators.

Figure 1. NCI-AD Domains and indicators

| Domain | NCI-AD Indicator |
| :--- | :--- |
| Community <br> Participation | Proportion of people who are able to participate in preferred activities outside of home when and <br> with whom they want |
| Choice and Decision <br> Making | Proportion of people who are involved in making decisions about their everyday lives including <br> where they live, what they do during the day, the staff that supports them and with whom they <br> spend time |
| Relationships | Proportion of people who are able to see or talk to their friends and families when they want to <br> SatisfactionProportion of people who are (not) lonely |
| Proportion of people who are satisfied with where they live <br> Service <br> Coordination | Proportion of people who are satisfied with staff who work with them <br> Proportion of people who know who to call with a complaint, concern, or question about their <br> services |
| Proportion of people whose CM talks to them about any needs that are not being met |  |
|  | Proportion of people who can get in contact with their CM when they need to |
|  | Proportion of people who receive the services that they need |
|  | Proportion of people finding out about services from service agencies |

| Domain | NCI-AD Indicator |
| :---: | :---: |
|  | Proportion of people who have an emergency plan in place |
|  | Proportion of people whose support workers come when they are supposed to |
|  | Proportion of people who use a relative as their support person |
| Care Coordination | Proportion of people discharged from the hospital or LTC facility who felt comfortable going home |
|  | Proportion of people making a transition from hospital or LTC facility who had adequate follow-up |
|  | Proportion of people who know how to manage their chronic conditions |
| Access | Proportion of people who have adequate transportation |
|  | Proportion of people who get needed equipment, assistive devices (wheelchairs, grab bars, home modifications, etc.) |
|  | Proportion of people who have access to information about services in their preferred language |
| Safety | Proportion of people who feel safe at home |
|  | Proportion of people who feel safe around their staff/ caregiver |
|  | Proportion of people who feel that their belongings are safe |
|  | Proportion of people whose fear of falling is managed |
|  | Proportion of people who are able to get to safety quickly in case of an emergency |
| Health Care | Proportion of people who have been to the ER in the past 12 months |
|  | Proportion of people who have had needed health screenings and vaccinations in a timely manner (e.g., vision, hearing, dental, etc.) |
|  | Proportion of people who can get an appointment their doctor when they need to |
|  | The proportion of people who have access to mental health services when they need them |
| Wellness | The proportion of people in poor health |
|  | Proportion of people with unaddressed memory concerns |
| Medications | Proportion of people taking medications that help them feel less sad/depressed |
|  | Proportion of people who know what their medications are for |
| Rights and Respect | Proportion of people whose basic rights are respected by others |

| Domain | NCI-AD Indicator |
| :---: | :---: |
|  | Proportion of people whose staff/worker/caregiver treat them with respect |
| Self-Direction of Care | Proportion of people self-directing |
|  | Proportion of people who can choose or change the kind of services they receive and who provides them |
| Work | Proportion of people who have a paid job |
|  | Proportion of people whose job pays at least minimum wage |
|  | Proportion of people who would like a job |
|  | Proportion of people who have had job search assistance |
|  | Proportion of people who volunteer |
| Everyday Living | Proportion of people who have adequate support to perform activities of daily living (bathing, toileting, taking meds, etc.) and IADLs (cleaning, laundry, etc.) |
|  | Proportion of people who have access to healthy foods |
| Affordability | Proportion of people who have ever had to cut back on food because of money |
| Planning for future | Proportion of people who want help planning for future need for services |
|  | Proportion of people who have decision-making assistance |
| Control | Proportion of people who feel in control of their lives |

## Organization of the Survey

The NCI-AD Adult Consumer Survey consists of a pre-survey form, a background information section, the in-person interview questions, and an interviewer feedback form. An additional Proxy Version of the survey is available for surveys conducted only with a proxy respondent. Each is described below.

Pre-Survey Information: This form has questions that help the interviewer prepare for the meeting. Pre-Survey information is not received by HSRI, is not analyzed and thus is not included in this report; it is for interviewer use only.

Background Information: This section consists of questions about the consumer's demographics, residence, and services and supports. Data are generally collected from state records, case managers, or a combination of both; when information is not available or is incomplete, the interviewer is responsible for collecting the missing background items at the end of the interview.

In-person interview questions: This section includes all questions for the full in-person interview. The survey is broken-out into thematic sub-sections with related questions grouped together (e.g., questions about employment are in the same section; questions about the home are in a separate section, etc.). This section is completed one-on-one with the person whenever possible. However, some questions throughout the survey may be answered (or assisted with) by a proxy respondent (e.g. family member or close friend) if the person receiving services is unable to respond or has asked for assistance with responding.

Proxy Version: This version of the survey is used when the person receiving services is unable to complete any of the survey or has asked that a proxy complete the survey on their behalf. This version includes only the questions that may be answered by a proxy respondent and has rephrased questions to reflect that questions are about the individual receiving services.

Interviewer Feedback: This form is completed by the interviewer after the interview to record information such as the length and place of the meeting, any problematic questions encountered, and general feedback for the project team.

## NCI-AD in Kansas

The Kansas Department for Aging and Disability Services (KDADS) implemented the 2015-2016 NCI-AD Adult Consumer Survey in Kansas. KDADS recognized the need for an assessment of the state's publicly-funded home and community based services (HCBS), including the HCBS/TBI, HCBS/PD, HCBS/FE, PACE, Senior Care Act and Older Americans Act (OAA) programs. The NCI-AD was identified by KDADS as a valuable tool that will allow comparisons to other States in the nation when it comes to community based services. Data from the project will be used to support efforts in Kansas to strengthen LTSS policy, inform quality assurance activities, and improve the quality of life of LTSS participants.

## Sample

The total number of NCI-AD Adult Consumer Surveys conducted in Kansas and included for analysis in 2015-2016 was 412 (Total $\mathrm{N}=412$ ). Six program populations were included in the survey sample.

Frail and Elderly (FE) Waiver: This program provides assistance to individuals ages 65 and older who qualify to receive Medicaid and require LTSS in order to remain in a community setting, as determined through a state level of care assessment. Services include Adult Day Care, Assistive Technology, Comprehensive Support, Enhanced Care Service, Financial Management Services, Home Telehealth, Medication Reminder, Nursing Evaluation Visit, Oral Health Services, Personal Care Services, Personal Emergency Response, and Wellness Monitoring. The option for individuals to self-direct their care is made available for the following services: Comprehensive Support, Enhanced Care Service, Financial Management Services, and Personal Care Services. One hundred and four people ( $\mathrm{N}=104$ ) from this program were included for analysis.

Physical Disability (PD) Waiver: This program provides LTSS to those individuals between the ages of 16 and 64 who have a qualifying physical disability, qualify to receive Medicaid, and require LTSS in order to remain in a community setting, as determined through a state level of care assessment. Services include Assistive Services, Enhanced Care Service, Financial Management Services, Home-Delivered Meals Service, Medication Reminder Services, Personal Care Services, and Personal Emergency Response. The option for individuals to self-direct their care is made available for the following services: Enhanced Care Service, Financial Management Services, and Personal Care Services. Eighty-two people (N=82) from this program were included for analysis.

Traumatic Brain Injury (TBI) Waiver: This program provides assistance to those individuals between the ages of 16 and 65 who have a documented and traumatically-incurred brain injury, demonstrate the capacity for progress in rehabilitation and independent living skills, qualify to receive Medicaid, and require LTSS in order to remain in a community setting, as determined through a state level of care assessment. Individuals who receive services through this waiver may continue to do so up to four years until it is determined that they are no longer making progress in rehabilitation and improved living
skills. Exceptions to this timeframe are subject to a standardized review process at the state level. Services include Assistive Services, Behavior Therapy, Cognitive Rehabilitation, Enhanced Care Service, Home-Delivered Meals Service, Medication Reminder Services, Occupational Therapy, Personal Care Services, Personal Emergency Response, Physical Therapy, and Transitional Living Skills. Eleven people ( $\mathrm{N}=11$ ) from this program were included for analysis

Older Americans Act (OAA): The Older Americans Act (OAA) was established by Congress in 1965 to provide services to seniors age 60 or older. The OAA program supports a range of home and community-based services, such as meals-onwheels and other nutrition programs, in-home services, transportation, legal services, elder abuse prevention and caregivers support. These programs help seniors stay as independent as possible in their homes and communities. In addition, OAA services help seniors avoid hospitalization and nursing home care and, as a result, save federal and state funds that otherwise would be spent on such care. One hundred and thirty-three people ( $N=133$ ) from this program were included for analysis.

Senior Care Act (SCA): The SCA provides a critical early intervention component to the Kansas long term care network. The SCA program provides services in the customer's home, such as homemaker, chore, attendant care, and case management services. The services are designed to prevent premature nursing home placement for persons who have not exhausted their financial resources. The program is targeted at those who are 60 years of age or older. Participants contribute a portion of the cost of SCA services. Participant contributions are determined by a sliding fee scale based upon self-reported income and liquid assets for individuals served by the program. Sixty-three people ( $N=63$ ) from this program were included for analysis.

Program of All-Inclusive Care (PACE): The PACE program is designed to promote the provision of quality, comprehensive health services for older adults. The primary care physicians and interdisciplinary team of professionals provide and coordinate all services for you, providing a "one stop shopping" for your needs. Most services are provided in your home and at the PACE Center. Four people ( $\mathrm{N}=4$ ) from this program were included for analysis.

Figure 2 below summarizes the programs included in Kansas' analysis sample, the number of surveys completed per program and included for analysis, and the number of participants eligible to be included in the survey by program. Also included are calculations
of margin of error for each program's estimate under two scenarios: assuming 0.5 distribution of responses and assuming 0.7 distribution of responses. Using the 0.5 distribution of responses is the most conservative assumption one can make when calculating margins of error and is usually used when no prior information is available at all about population proportions. When prior evidence exists about likely distributions of proportions or averages in the population, those proportions can be used in calculating somewhat less conservative margins of error. Based on the data collected so far (including evidence from the large-scale pilot conducted during development phase of the NCI-AD Adult Consumer Survey), it is reasonable to assume a less conservative population proportion (response distribution) of 0.7 when calculating margins of error for the individual programs. Resulting margins of error are shown under both assumptions. Both scenarios use all completed analyzed surveys as sample program $N$ in the calculations. Readers should be cautioned that for some survey items, the actual number of valid responses may be smaller than the number of completed surveys. This is explained in more detail in the following section "Organization of Results".

Figure 2. Programs included, number of surveys, and margins of error

| Program | Number of surveys | Number of eligible participants | Margin of error and confidence level for estimate (using 0.5 distribution) | Margin of error and confidence level for estimate (using 0.7 distribution) |
| :---: | :---: | :---: | :---: | :---: |
| FE Waiver | 104 | $\sim 5,000$ | 95\% Confidence Level, 9.5\% Margin of Error | 95\% Confidence Level, 8.7\% Margin of Error |
| PD Waiver | 82 | $\sim 6,000$ | 95\% Confidence Level, 10.8\% Margin of Error | 95\% Confidence Level, 9.9\% Margin of Error |
| TBI Waiver | 11 | $\sim 500$ | 95\% Confidence Level, 29.3\% Margin of Error | 95\% Confidence Level, 26.8\% Margin of Error |
| OAA | 133 | $\sim 6,000$ | 95\% Confidence Level, 8.4\% Margin of Error | 95\% Confidence Level, 7.7\% Margin of Error |
| SCA | 63 | $\sim 1,000$ | 95\% Confidence Level, 12.0\% Margin of Error | 95\% Confidence Level, 11.0\% Margin of Error |

| Program | Number of <br> surveys | Number of <br> eligible <br> participants | Margin of error and confidence level <br> for estimate (using 0.5 distribution) | Margin of error and confidence level <br> for estimate (using 0.7 distribution) |
| :--- | :--- | :--- | :--- | :--- |
| PACE | 4 | $\sim 400$ | 95\% Confidence Level, $48.8 \%$ Margin of <br> Error | 95\% Confidence Level, $44.7 \%$ Margin of <br> Error |
| Total | $\mathbf{4 1 \mathbf { m } ^ { \mathbf { 3 } }}$ | $\mathbf{\sim 1 8 , 9 0 0}$ |  |  |

## Survey Process

KDADS utilized agency resources to provide the random samples of program participants and conduct the interview. The samples were provided via a secure web-based application to survey staff. The survey process consists of a representative random sample selection of the FE, PD, and TBI waiver programs. Reviews include; consulting with Service Providers, reviewing system records, and interviews with individuals. Information obtained by QMS staff is entered in the ODESA database.

## Stakeholders

KDADS provides ongoing NCI-AD stakeholder engagement activities through various stakeholders within the state. These stakeholders include; the PACE program, Kansas Health Care Association, LeadingAge, KACE, LTC Ombudsman, Area Agency on Aging, HCBS Participants, HCBS Providers, SCA, OAA, and InterHab. KDADS meets with the stakeholders each month through various committees and settings to engage in discussion related to surveys on client experience as well as response to data from completed surveys.

[^1]
## Organization of Results

The following section of the report presents findings from Kansas's 2015-16 NCI-AD data collection cycle. Results are grouped by domain and are presented in chart format. Charts show collapsed data broken out by each of the six programs included in the sample, as well as the Kansas state average. The number of respondents for each program and the state as a whole is also shown. For rules on collapsing response options, please refer to Appendix A.

The Ns (number of respondents for each individual program and the state) shown in each chart is the number of valid responses to that survey item. That number may be smaller than the total number of completed surveys for a number of reasons:

- Certain questions in the survey could only be asked of the target interviewee - i.e. no proxy respondents were allowed for those questions. As the number of completed surveys includes both the full in-person surveys and the proxy surveys, these questions were only asked in the full in-person survey and thus have a smaller number of respondents.
- Only valid responses were included in both denominator and numerator. The Ns also represent the number of valid responses only. Unclear, refused and, unless otherwise stated, "don't know" responses were excluded.
- The survey contains a number of skip logic patterns. This means that depending on the response to a previous survey item, a question may or may not be asked, as appropriate. When a question is skipped due to survey logic, that particular respondent does not contribute to the calculations for the item and does not contribute to the N .

Kansas state average is a simple average. A weighted estimate was not needed because Kansas sampled the six programs proportionally to the population receiving services.

Un-collapsed data showing all categories of responses by program and the sample overall are shown in tabular format in Appendix B.

## Limitations of Data

This report contains survey results related to the quality and impact of LTSS in Kansas. However, benchmarks for acceptable or unacceptable levels of performance for the programs or the state overall are not included. Rather, it is up to stakeholders to assess the information contained in this report and draw conclusions. This report is intended to be one mechanism for State leaders and community stakeholders to assess the current state of LTSS system and identify areas that are working well, and areas that could use improvement. The results charts throughout this report display program scores relative to one another and to Kansas state average. It is up to public managers, policy-makers, and other stakeholders to decide whether a program's result relative to the state average suggests that changes or further investigation are necessary. Also, by aligning NCI-AD measures with specific state and federal initiatives, Kansas can more accurately reflect the areas in which transformation is evident and continue to promote efforts accordingly, while recognizing limitations and ongoing challenges.

Extreme caution should be exercised when interpreting results where the sample size is small. The sample sizes for each program are shown in each chart and table. Anytime the sample size is smaller than 20 , the N is also asterisked. Reader should be very careful interpreting results based on small Ns; in fact, no conclusions should be drawn - instead, the reader should treat the data as suggestive and informational only. In addition, caution should be used comparing a program's result relative to another program due to similarities and differences between program participants.

## Community Participation

People are able to participate in preferred activities outside of home when and with whom they want.
There is one Community Participation indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are able to participate in preferred activities outside of home when and with whom they want.

There are two survey items that correspond to the Community Participation domain.

Un-collapsed data for state and programs are shown in Appendix B.

Graph 1. Proportion of people who are able to do things they enjoy outside of their home when and with whom they want to.

[^2]
## Choice and Decision Making

People are involved in making decisions about their everyday lives and with whom they spend their time.

There is one Choice and Decision Making indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are involved in making decisions about their everyday lives including where they live, what they do during the day, the staff that supports them and with whom they spend time

There are four survey items that correspond to the Choice and Decision Making domain.

Un-collapsed data for state and programs are shown in Appendix B.

Graph 2. Proportion of people who are able to choose their roommate (if in group setting)

[^3]Graph 3. Proportion of people who get up and go to bed at the time when they want

[^4]Graph 4. Proportion of people who can eat their meals when they want

* Very small number of responses

Graph 5. Proportion of people who are able to decide how to furnish and decorate their room (if in group setting)

[^5]
## Relationships

People have friends and relationships and do not feel lonely.
There are two Relationship indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are able to see or talk to their friends and families when they want to.
2. Proportion of people who are (not) lonely.

There are three survey items that correspond to the Relationship domain.
Un-collapsed data for state and programs are shown in Appendix B.

Graph 6. Proportion of people who can always or almost always see or talk to friends and family when they want to (if there are friends and family who do not live with person)

* Very small number of responses

Graph 7. Proportion of people who sometimes or often feel lonely, sad or depressed

* Very small number of responses

## Satisfaction

People are satisfied with their everyday lives - where they live, who works with them, and what they do during the day.

There are three Satisfaction indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are satisfied with where they live.
2. Proportion of people who are satisfied with what they do during the day.
3. Proportion of people who are satisfied with staff who work with them.

There are seven survey items that correspond to the Satisfaction domain.
Un-collapsed data for state and programs are shown in Appendix B.

Graph 8. Proportion of people who like where they are living

[^6]Graph 9. Proportion of people who would prefer to live somewhere else

[^7]Graph 10. Proportion of people who like how they usually spend their time during the day

[^8]Graph 11. Proportion of people whose paid support staff change too often

* Very small number of responses

Graph 12. Proportion of people whose paid support staff do things the way they want them done

* Very small number of responses

## Service Coordination

Service coordinators are accessible, responsive, and support the person's participation in service planning and the person receives needed services.

There are nine Service Coordination indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who know who to call with a complaint, concern, or question about their services
2. Proportion of people whose CM talks to them about any needs that are not being met
3. Proportion of people who can get in contact with their CM when they need to
4. Proportion of people who receive the services that they need
5. Proportion of people finding out about services from service agencies ${ }^{4}$
6. Proportion of people who want help planning for future need for services
7. Proportion of people who have an emergency plan in place
8. Proportion of people whose support workers come when they are supposed to
9. Proportion of people who use a relative as their support person

There are thirteen survey items that correspond to the Service Coordination domain.

Un-collapsed data for state and programs are shown in Appendix B.

[^9]Graph 13. Proportion of people who know whom to call if they have a complaint about their services

* Very small number of responses

Graph 14. Proportion of people who know whom to call to get information if their needs change and they need new or different types of services and supports

[^10]Graph 15. Proportion of people who can reach their case manager/care coordinator when they need to (if know they have case manager/care coordinator)

[^11]Graph 16. Proportion of people whose paid support staff show up and leave when they are supposed to

* Very small number of responses

Graph 17. Proportion of people who have an emergency plan in place

* Very small number of responses

Graph 18. Proportion of people who want help planning for their future need for services

[^12]Graph 19. Proportion of people whose services meet all their needs and goals

[^13]Graph 20. Proportion of people whose case manager/care coordinator talked to them about services that might help with unmet needs and goals (if have case manager and have unmet needs and goals)

Graph 21. Proportion of people whose family member (unpaid or paid) is the person who helps them most often

* Very small number of responses

Graph 22. Proportion of people whose family member (unpaid or paid) provides additional assistance

* Very small number of responses

## Care Coordination

Individuals are provided appropriate coordination of care.

There are three Care Coordination indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people discharged from the hospital or LTC facility who felt comfortable going home.
2. Proportion of people making a transition from hospital or LTC facility who had adequate follow-up.
3. Proportion of people who know how to manage their chronic conditions.

There are five survey items that correspond to the Care Coordination domain.

Un-collapsed data for state and programs are shown in Appendix B.

Graph 23. Proportion of people who stayed overnight in a hospital or rehabilitation facility (and were discharged to go home) in past year

[^14]Graph 24. Proportion of people who reported feeling comfortable and supported enough to go home after being discharged from a hospital or rehabilitation facility (if occurred in the past year)

[^15]Graph 25. Proportion of people who reported someone followed-up with them after discharge from a hospital or rehabilitation facility (if occurred in the past year)

[^16]Graph 26. Proportion of people who reported having one or more chronic condition(s)

* Very small number of responses

Graph 27. Proportion of people who reported know how to manage their chronic condition(s)

[^17]
## Access

Publicly funded services are readily available to individuals who need and qualify for them.

There are three Access indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have adequate transportation.
2. Proportion of people who get needed equipment, assistive devices (wheelchairs, grab bars, home modifications, etc.)
3. Proportion of people who have access to information about services in their preferred language.

There are five survey items that correspond to the Access domain.

Un-collapsed data for state and programs are shown in Appendix B.

Graph 28. Proportion of people who have transportation when they want to do things outside of their home

* Very small number of responses

Graph 29. Proportion of people who have transportation to get to medical appointments when they need to

[^18]Graph 30. Proportion of people who receive information about their services in the language they prefer (if non-English)

[^19]Graph 31. Proportion of people who need new grab bars in the bathroom or elsewhere in home

* Very small number of responses

Graph 32. Proportion of people who need an upgrade to grab bars in the bathroom or elsewhere in home

[^20]Graph 33. Proportion of people who need new bathroom modifications (other than grab bars)

* Very small number of responses

Graph 34. Proportion of people who need an upgrade to bathroom modifications (other than grab bars)

[^21]Graph 35. Proportion of people who need a new specialized bed

* Very small number of responses

Graph 36. Proportion of people who need an upgrade to specialized bed

## Safety

People feel safe from abuse, neglect, and injury.
There are five Safety indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who feel safe at home.
2. Proportion of people who feel safe around their staff/ caregiver.
3. Proportion of people who feel that their belongings are safe.
4. Proportion of people whose fear of falling is managed.
5. Proportion of people who are able to get to safety quickly in case of an emergency.

There are seven survey items that correspond to the Safety domain.

Un-collapsed data for state and programs are shown in Appendix B.

## Graph 63. Proportion of people who feel safe at home

[^29]Graph 64. Proportion of people who feel safe around their paid support staff

[^31]Graph 69. Proportion of people who are able to get to safety quickly in case
of an emergency like a fire or a natural disaster

* Very small number of responses

## Health Care

## People secure needed health services.

There are four Health Care indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have been to the ER in the past 12 months.
2. Proportion of people who have had needed health screenings and vaccinations in a timely manner (e.g., vision, hearing, dental, etc.)
3. Proportion of people who can get an appointment their doctor when they need to.
4. The proportion of people who have access to mental health services when they need them.

There are twelve survey items that correspond to the Health Care domain.

Un-collapsed data for state and programs are shown in Appendix B.

Graph 70. Proportion of people who have gone to the emergency room for tooth or mouth pain in past year

* Very small number of responses

Graph 71. Proportion of people who have gone to the emergency room for falling or losing balance in past year

Graph 81. Proportion of people who have had a cholesterol screening done by a doctor or nurse in the past five years

* Very small number of responses

## Wellness

## People are supported to maintain health.

There are two Wellness indicators measured by the NCI-AD Adult Consumer Survey:

1. The proportion of people in poor health.
2. Proportion of people with unaddressed memory concerns.

There are four survey items that correspond to the Wellness domain.

Un-collapsed data for state and programs are shown in Appendix B.

Graph 82. Proportion of people who describe their overall health as poor

* Very small number of responses

Graph 83. Proportion of people who reported their health is much better or somewhat better compared to 12 months ago

Proportion of people who reported their health is much better or somewhat better compared to 12 months ago

* Very small number of responses

Graph 84. Proportion of people who reported they forget things more often than before during the past 12 months

* Very small number of responses

Graph 85. Proportion of people who have discussed (or somebody else discussed) their forgetting things with a doctor or a nurse (if forget things more often during the past 12 months)

[^34]
## Medications

## Medications are managed effectively and appropriately.

There are two Medication indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people taking medications that help them feel less sad/depressed.
2. Proportion of people who know what their medications are for.

There are three survey items that correspond to the Medication domain.

Un-collapsed data for state and programs are shown in Appendix B.

Graph 86. Proportion of people who take medications that help them feel less sad or depressed

[^35]Graph 87. Proportion of people who take or are supposed to take any prescription medications

[^36]Graph 88. Proportion of people who understand why they take their prescription medications and what they are for (if take or are supposed to take prescription medications)

* Very small number of responses

## Rights and Respect

People receive the same respect and protections as others in the community.
There are two Rights and Respect indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people whose basic rights are respected by others.
2. Proportion of people whose staff/worker/caregiver treat them with respect.

There are nine survey items that correspond to the Rights and Respect domain.

Un-collapsed data for state and programs are shown in Appendix B.

Graph 89. Proportion of people who feel that their paid support staff treat them with respect

* Very small number of responses

Graph 90. Proportion of people who report that others ask permission before entering their home/room

Graph 91. Proportion of people who are able to lock the doors to their room if they want to (if in group setting)

* Very small number of responses

Graph 92. Proportion of people who have enough privacy in their home (if in group setting)

* Very small number of responses

Graph 93. Proportion of people who are able to have visitors come at any time (if in group setting)

* Very small number of responses

Graph 94. Proportion of people who have privacy with visitors at home if they want it (if in group setting)

* Very small number of responses

Graph 95. Proportion of people who can use the phone privately whenever they want to (if in group setting)

[^37]Graph 96. Proportion of people who have access to food at all times of the day (if in group setting)

* Very small number of responses

Graph 97. Proportion of people whose mail or email is read without asking
them first (if in group setting)

* Very small number of responses

## Self-Direction of Care

People have authority and are supported to direct and manage their own services.

There are two Self-Direction of Care indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people self-directing.
2. Proportion of people who can choose or change the kind of services they receive and who provides them.

There are three survey items that correspond to the Self-Direction of Care domain. Proportion of people self-directing is derived from state administrative records.

Un-collapsed data for state and programs are shown in Appendix B.

Graph 98. Proportion of people who are participating in a self-directed supports option (as defined by their State-data for this indicator come directly from State administrative records)

[^38]Graph 99. Proportion of people who can choose or change what kind of services they get and determine how often and when they get them

[^39]Graph 100. Proportion of people who can choose or change who provides
their services if they want to

* Very small number of responses

## Work

People have support to find and maintain community integrated employment if they want it.

There are five Work indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have a paid job.
2. Proportion of people whose job pays at least minimum wage ${ }^{5}$.
3. Proportion of people who would like a job.
4. Proportion of people who have had job search assistance.
5. Proportion of people who volunteer.

There are five survey items that correspond to the Work domain.

Un-collapsed for state and programs are shown in Appendix B.

[^40]Graph 101. Proportion of people who have a paying job in the community, either full-time or part-time

* Very small number of responses

Graph 102. Proportion of people who would like a job (if not currently employed)

* Very small number of responses

Graph 103. Proportion of people who reported that someone has talked to them about job options (if wanted a job)

* Very small number of responses

Graph 104. Proportion of people who do volunteer work

[^41]
## Everyday Living

People have enough supports for everyday living.

There are two Everyday Living indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have adequate support to perform activities of daily living (bathing, toileting, taking meds, etc.) and IADLs (cleaning, laundry, etc.)
2. Proportion of people who have access to healthy foods.

There are five survey items that correspond to the Everyday Living domain.

Un-collapsed data for state and programs are shown in Appendix B.

Graph 105. Proportion of people who generally need a lot or some assistance with everyday activities (things like preparing meals, housework, shopping or taking their medications)

[^42]Graph 106. Proportion of people who always get enough assistance with everyday activities when they need it (if need any assistance) (things like preparing meals, housework, shopping or taking their medications)

* Very small number of responses

Graph 107. Proportion of people who generally need a lot or some assistance for self-care (things like bathing, dressing, going to the bathroom, eating, or moving around their home)

[^43]Graph 108. Proportion of people who always get enough assistance with selfcare when they need it (if need any assistance) (things like bathing, dressing, going to the bathroom, eating, or moving around their home)

[^44]Graph 109. Proportion of people who have access to healthy foods like fruits and vegetables when they want them

* Very small number of responses

## Affordability

People have enough available resources.

There is one Affordability indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have ever had to cut back on food because of money.

There is one survey item that corresponds to the Affordability domain.
Un-collapsed data for state and programs are shown in Appendix B.

Graph 110. Proportion of people who ever have to skip a meal due to
financial worries

|  | State Average (11\%) $\mathrm{N}=401$ |  |  |  |  |

* Very small number of responses

## Planning for future

People have support to plan and make decision about the future.

There are two Planning for Future indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who want help planning for future need for services.
2. Proportion of people who have decision-making assistance.

There are two survey items that correspond to the Planning for Future domain.

Un-collapsed data for state and programs are shown in Appendix B.

Graph 111. Proportion of people who want help planning for their future
need for services

* Very small number of responses

## Control

## People feel in control of their lives

There is one Control indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who feel in control of their lives.

There is one survey item that corresponds to the Control domain.
This section also includes presentation of results on a ranking of what is most important to people surveyed ${ }^{6}$.

Un-collapsed data for state and programs are shown in Appendix B.
${ }^{6}$ Data shown in Appendix B only

Graph 112. Proportion of people who feel in control of their life

* Very small number of responses

## Appendix A

Rules for Recoding and Collapsing Responses

Below is a table that details collapsing and recoding logic for indicators that were measured using anything other than a "Yes/No" binary response. The number in the third column refers to the table number in the report where the indicator can be found. Unless otherwise stated, "don' know" and "unclear/refused" responses are excluded from both numerator and denominator.

Table A1. Outcome Variables - Collapsing Rules

| Domain | Indicator | Graph \# | Recoding/Collapsing Logic |
| :---: | :---: | :---: | :---: |
| Community Participation | Proportion of people who are able to do things they enjoy outside of their home when and with whom they want to | 1 | Collapse "No" and "Sometimes" |
|  | Proportion of people who get up and go to bed at the time they want | 3 | Collapse "Some days, sometimes" and "No, never" |
| Choice and Decision | Proportion of people who can eat their meals when they want | 4 | Collapse "Some days, sometimes" and "No, never" |
| Making | Proportion of people who are able to decide how to furnish and decorate their room (if in group setting) | 5 | Collapse "In-between, able to decide some ways" and "No" |
|  | Proportion of people who can always or almost always see or talk to friends and family when they want to (if there are friends | 6 | Collapse "Most of the time, usually, or some family and/or friends" and "No, or only sometimes" |
| Relationships | and family who do not live with person) |  |  |
|  | Proportion of people who sometimes or often feel lonely, sad or depressed | 7 | Collapse "Often" and "Sometimes"; Collapse "Not often" and "Never or almost never" |
| Satisfaction | Proportion of people who like where they are living | 8 | Collapse "In-between, most of the time" and "No" |

| Domain | Indicator | Graph |
| :---: | :---: | :---: |
|  | Proportion of people who would prefer to live somewhere else | 9 |
|  | Proportion of people who like how they usually spend their time during the day | 10 |
|  | Proportion of people whose paid support staff change too often | 11 |
|  | Proportion of people whose paid support staff do things the way they want them done | 12 |
|  | Proportion of people who know whom to call if they have a complaint about their services | 13 |
| Service Coordination | Proportion of people who know whom to call to get information if their needs change and they need new or different types of services and supports | 14 |
|  | Proportion of people who can reach their case manager/ care coordinator when they need to (if they know they have a case manager/ care coordinator) | 15 |
|  | Proportion of people whose paid support staff show up and leave when they are supposed to | 16 |
|  | Proportion of people whose services meet all their needs and goals | 19 |

Graph \#

9

Collapse "Yes" and "Maybe"

Collapse "Yes, always, or almost always" and "Some days, sometimes"
Collapse "Yes" and "Some, or sometimes"
Collapse "No, never or rarely" and
"Some, or usually"
"Maybe, not sure" response treated as "don't know" and excluded from both numerator and denominator
"Maybe, not sure" response treated as "don't know" and excluded from both numerator and denominator

Collapse "No, or only sometimes" and "Most of the time, usually"

Collapse "No, never or rarely" and "Some, or usually"

Collapse "No, not at all, needs or goals are not met", "Somewhat, some needs and goals" and
"Mostly, most needs and goals"

## Recoding/Collapsing Logic

|  | Proportion of people whose <br> family member (unpaid or paid) <br> is the person who helps them <br> most often | 21 |
| :--- | :--- | :--- |
|  | Proportion of people whose <br> family member (unpaid or paid) <br> provides additional assistance | 22 |
|  | Proportion of people who stayed <br> overnight in a hospital or rehab <br> facility (and were discharged to <br> go home) in past year | 23 |
| Care |  |  |
| Proportion of people who |  |  |
| reported feeling comfortable |  |  |
| and supported enough to go |  |  |
| home after being discharged |  |  |
| from a hospital or rehab facility |  |  |
| (if occurred in the past year) |  |  |
| Proportion of people who |  |  |
| reported they know how to |  |  |
| manage their chronic conditions |  |  |$\quad 24$

Collapse "Paid family member or spouse/partner" and "Unpaid family member or spouse/partner"
