

**National Core Indicators
Aging and Disability Adult Consumer Survey**

2016-2017 Oregon Results

Preface

The Oregon Department of Human Services Aging and People with Disabilities Program (APD) administers Medicaid-paid long-term services and supports (LTSS) for over 35,000 older adults and people with physical disabilities. APD's vision is for Oregon's older adults, people with disabilities and their families to have easy access to services, supports and early interventions that help maintain independence, promote well-being, honor choice, respect cultural preferences and uphold dignity. To fulfill this vision, Oregon has a diverse array of settings including in-home, community based care and nursing facilities. Oregon's strong commitment to serving people in community settings is evidenced by the fact that 87.4% of recipients receive their services in home and community based settings. Most of our services are funded through the Community First Choice - Medicaid State Plan (K plan) option.

Oregon could not be more excited to launch the National Core Indicators - Aging and Disability (NCI-AD) project for the first time in the 2016-2017 survey cycle. NCI-AD provides consumer feedback critical for understanding and assessing current program strengths, needs and gaps. With a rapidly growing older adult and adults with disabilities population, ongoing budget challenges and the need for data-driven solutions and public accountability, the NCI-AD data will be a critical tool as we strategize and prioritize the best ways to meet needs of Oregonians. In addition, by capturing a consumer perspective, NCI-AD helps the state complete and understand a balanced picture of facility and in-home care. Since the Oregon NCI-AD sample is stratified by service provider type, the state can begin to see individual strengths and gaps of each LTSS option.

NCI-AD aligns with the priorities of our Governor, the Honorable Kate Brown and her commitment to greater public transparency and community engagement by Oregon state government. NCI-AD is a foundation to engage stakeholders in discussions about the data and its implications for policy and program changes as well as another measure of progress over the multi-year implementation of the Home and Community Based Services regulations on person centered care.

This first year's data provides a baseline for Oregon. In the future, Oregon will also survey people receiving Older Americans Act (OAA) services and people receiving entirely state funded, preventative in-home services through Oregon Project Independence (OPI). Once NCI-AD is fully deployed across Medicaid, OAA and OPI, Oregon will have a very rich data warehouse of consumer

feedback as a base to plan, assess and improve services, service delivery, outcomes and consumer satisfaction. Honoring and using this consumer feedback is another way Oregon realizes its goals of supporting independence, well-being, choice and dignity.

List of Abbreviations Used in This Report

AAA – Area Agencies on Aging

ADL – Activities of Daily Living

APD – Aging and People with Disabilities

CM – case manager

ER – emergency room

HSRI – Human Services Research Institute

IADL – Instrumental Activities of Daily Living

LTC – Long Term Care

LTSS – Long Term Services and Supports

N – Number of respondents

NASUAD – National Association of States United for Aging and Disabilities

NCI-AD – National Core Indicators for Aging and Disabilities

OAA – Older Americans Act

OPI – Oregon Project Independence

PACE – Program of All-Inclusive Care for the Elderly

Table of Contents

Preface	2
List of Abbreviations Used in This Report.....	4
Table of Contents.....	5
What is NCI-AD?.....	28
NCI-AD Survey.....	28
Survey Overview	28
Figure 1. NCI-AD Domains and indicators.....	29
Survey Organization.....	31
NCI-AD in Oregon.....	33
Sample.....	33
Figure 2. Programs and settings included, number of surveys included for analysis, and margins of error	35
Survey Process in Oregon	36
Stakeholders	36
Organization of Results.....	37

Limitations of Data..... 38

Community Participation 39

 Graph 1. Proportion of people who are as active in the community as they would like to be..... 40

 Graph 2. Proportion of people who have tried to leave the house to go somewhere in the past week and have not been able to.
 40

Choice and Decision Making 41

 Graph 3. Proportion of people who are able to choose their roommate (if in group setting) 42

 Graph 4. Proportion of people who get up and go to bed at the time when they want 42

 Graph 5. Proportion of people who can eat their meals when they want..... 43

 Graph 6. Proportion of people who are able to decide how to furnish and decorate their room (if in group setting) 43

Relationships..... 44

 Graph 7. Proportion of people who can always or almost always see or talk to friends and family when they want to (if there are
 friends and family who do not live with person)..... 45

Satisfaction..... 46

 Graph 8. Proportion of people who like where they are living 47

 Graph 9. Proportion of people who would prefer to live somewhere else 47

Graph 10. Proportion of people who always like how they usually spend their time during the day.....	48
Graph 11. Proportion of people whose paid support staff change too often.....	48
Graph 12. Proportion of people whose paid support staff do things the way they want them done.....	49
Service Coordination.....	50
Graph 13. Proportion of people who know whom to contact if they want to make changes to their services.....	51
Graph 14. Proportion of people who can reach their case manager/care coordinator when they need to (if know they have case manager/care coordinator)	51
Graph 15. Proportion of people whose paid support staff show up and leave when they are supposed to	52
Graph 16. Proportion of people who have an emergency plan in place.....	52
Graph 17. Proportion of people who want help planning for their future need for services.....	53
Graph 18. Proportion of people whose services meet all their needs and goals.....	53
Graph 19. Proportion of people whose case manager/care coordinator talked to them about services that might help with unmet needs and goals (if have case manager and have unmet needs and goals)	54
Graph 20. Proportion of people whose family member (unpaid or paid) is the person who helps them most often.....	54
Graph 21. Proportion of people whose family member (unpaid or paid) provides additional assistance	55
Graph 22. Proportion of people who have a backup plan if their paid support people do not show up	55

Care Coordination	56
Graph 23. Proportion of people who stayed overnight in a hospital or rehabilitation facility (and were discharged to go home) in past year.....	57
Graph 24. Proportion of people who reported feeling comfortable and supported enough to go home after being discharged from a hospital or rehabilitation facility (if occurred in the past year)	57
Graph 25. Proportion of people who reported someone followed-up with them after discharge from a hospital or rehabilitation facility (if occurred in the past year).....	58
Graph 26. Proportion of people who reported having one or more chronic condition(s)	58
Graph 27. Proportion of people who reported they know how to manage their chronic condition(s)	59
Access.....	60
Graph 28. Proportion of people who have transportation when they want to do things outside of their home.....	61
Graph 29. Proportion of people who have transportation to get to medical appointments when they need to.....	61
Graph 30. Proportion of people who receive information about their services in the language they prefer (if non-English)	62
Graph 31. Proportion of people who need new grab bars in the bathroom or elsewhere in home	62
Graph 32. Proportion of people who need an upgrade to grab bars in the bathroom or elsewhere in home	63
Graph 33. Proportion of people who need new bathroom modifications (other than grab bars)	63
Graph 34. Proportion of people who need an upgrade to bathroom modifications (other than grab bars)	64

Graph 35. Proportion of people who need a new specialized bed	64
Graph 36. Proportion of people who need an upgrade to specialized bed	65
Graph 37. Proportion of people who need a new ramp or stair lift in or outside the home.....	65
Graph 38. Proportion of people who need an upgrade to a ramp or stair lift in or outside the home.....	66
Graph 39. Proportion of people who need a new remote monitoring system.....	66
Graph 40. Proportion of people who need an upgrade to remote monitoring system.....	67
Graph 41. Proportion of people who need a new emergency response system.....	67
Graph 42. Proportion of people who need an upgrade to emergency response system.....	68
Graph 43. Proportion of people who need other new home modifications.....	68
Graph 44. Proportion of people who need an upgrade to other home modifications.....	69
Graph 45. Proportion of people who need a new walker	69
Graph 46. Proportion of people who need an upgrade to a walker	70
Graph 47. Proportion of people who need a new scooter.....	70
Graph 48. Proportion of people who need an upgrade to a scooter.....	71
Graph 49. Proportion of people who need a new cane	71

Graph 50. Proportion of people who need an upgrade to a cane	72
Graph 51. Proportion of people who need a new wheelchair	72
Graph 52. Proportion of people who need an upgrade to a wheelchair	73
Graph 53. Proportion of people who need new hearing aids	73
Graph 54. Proportion of people who need an upgrade to hearing aids	74
Graph 55. Proportion of people who need new glasses	74
Graph 56. Proportion of people who need an upgrade to glasses.....	75
Graph 57. Proportion of people who need a new communication device	75
Graph 58. Proportion of people who need an upgrade to a communication device	76
Graph 59. Proportion of people who need other new assistive devices	76
Graph 60. Proportion of people who need an upgrade to other assistive devices.....	77
Safety	78
Graph 61. Proportion of people who feel safe at home.....	79
Graph 62. Proportion of people who feel safe around their paid support staff	79
Graph 63. Proportion of people who are ever worried for the security of their personal belongings.....	80

Graph 64. Proportion of people whose money was taken or used without their permission in the last 12 months	80
Graph 65. Proportion of people who have concerns about falling or being unstable (or about whom there are concerns)	81
Graph 66. Proportion of people with whom somebody talked to or worked with to reduce risk of falling or being unstable (if there are such concerns)	81
Graph 67. Proportion of people who are able to get to safety quickly in case of an emergency like a fire or a natural disaster ..	82
Health Care	83
Graph 68. Proportion of people who have gone to the emergency room for any reason in the past year	84
Graph 69. Proportion of people whose one or more visit to the ER in the past year was due to falling or losing balance (if went to ER in past year)	84
Graph 70. Proportion of people whose one or more visit to the ER in the past year was due to tooth or mouth pain (if went to ER in the past year)	85
Graph 71. Proportion of people who can get an appointment to see their primary care doctor when they need to	85
Graph 72. Proportion of people who have talked to someone about feeling sad and depressed during the past 12 months (if feeling sad and depressed)	86
Graph 73. Proportion of people who have had a physical exam or wellness visit in the past year	86
Graph 74. Proportion of people who have had a hearing exam in the past year	87
Graph 75. Proportion of people who have had a vision exam in the past year	87

Graph 76. Proportion of people who have had a flu shot in the past year 88

Graph 77. Proportion of people who have had a routine dental visit in the past year 88

Graph 78. Proportion of people who have had a cholesterol screening in the past five years 89

Wellness 90

Graph 79. Proportion of people who describe their overall health as poor 91

Graph 80. Proportion of people who reported their health is much better or somewhat better compared to 12 months ago.... 91

Graph 81. Proportion of people who reported they forget things more often than before during the past 12 months 92

Graph 82. Proportion of people who have discussed (or somebody else discussed) their forgetting things with a doctor or a nurse (if forget things more often during the past 12 months) 92

Graph 83. Proportion of people who describe themselves as having a chronic psychiatric or mental health diagnosis 93

Graph 84. Proportion of people who feel sad or depressed at least sometimes or often 93

Graph 85. Proportion of people with chronic conditions..... 94

Graph 86. Proportion of people who describe their hearing as poor (taking into account hearing aids, if any) 94

Graph 87. Proportion of people who describe their vision as poor (taking into account glasses or contacts, if any) 95

Graph 88. Proportion of people who describe themselves as having a physical disability) 95

Medications 96

Graph 89. Proportion of people who take medications that help them feel less sad or depressed	97
Graph 90. Proportion of people who understand what their prescription medications are for (if take prescription medications)	97
Rights and Respect.....	98
Graph 91. Proportion of people who feel that their paid support staff treat them with respect	99
Graph 92. Proportion of people who report that others ask permission before entering their home/room (if in group setting).	99
Graph 93. Proportion of people who are able to lock the doors to their room if they want to (if in group setting)	100
Graph 94. Proportion of people who have enough privacy in their home (if in group setting)	100
Graph 95. Proportion of people who are able to have visitors come at any time (if in group setting)	101
Graph 96. Proportion of people who can use the phone privately whenever they want to (if in group setting)	101
Graph 97. Proportion of people who have access to food at all times of day (if in group setting)	102
Graph 98. Proportion of people whose mail or email is read without asking them first (if in group setting).....	102
Self-Direction of Care.....	103
Graph 99. Proportion of people who are participating in a self-directed supports option (as defined by their State—data for this indicator come directly from State administrative records)	104
Graph 100. Proportion of people who can choose or change what kind of services they get	104

Graph 101. Proportion of people who can choose or change how often and when they get services	105
Graph 102. Proportion of people who can change their paid support staff	105
Work.....	106
Graph 103. Proportion of people who have a paying job in the community.....	107
Graph 104. Proportion of people who would like a job (if not currently employed)	107
Graph 105. Proportion of people who reported that someone has talked to them about job options (if wanted a job)	108
Graph 106. Proportion of people who do volunteer work.....	108
Graph 107. Proportion of people who would like to do volunteer work (if not currently volunteering).....	109
Everyday Living.....	110
Graph 108. Proportion of people who generally need a lot or some assistance with everyday activities (things like preparing meals, housework, shopping or taking their medications)	111
Graph 109. Proportion of people who always get enough assistance with everyday activities when they need it (if need any assistance) (things like preparing meals, housework, shopping or taking their medications)	111
Graph 110. Proportion of people who generally need a lot or some assistance for self-care (things like bathing, dressing, going to the bathroom, eating, or moving around their home)	112
Graph 111. Proportion of people who always get enough assistance with self-care when they need it (if need any assistance) (things like bathing, dressing, going to the bathroom, eating, or moving around their home)	112

Graph 112. Proportion of people who have access to healthy foods like fruits and vegetables when they want them	113
Affordability	114
Graph 113. Proportion of people who ever have to skip a meal due to financial worries	115
Planning for future	116
Graph 114. Proportion of people who want help planning for their future need for services.....	117
Control	118
Graph 115. Proportion of people who never feel in control of their life	119

What is NCI-AD?

The National Core Indicators for Aging and Disabilities© (NCI-AD) are standard measures used across participating states to assess the quality of life and outcomes of seniors and adults with physical disabilities—including traumatic or acquired brain injury—who are accessing publicly-funded services through Medicaid, the Older Americans Act, Program of All-Inclusive Care for the Elderly (PACE), skilled nursing facilities/nursing homes, and/or state-funded programs. The effort is coordinated by the National Association of States United for Aging and Disabilities¹ (NASUAD) and Human Services Research Institute (HSRI). Data for the project are gathered through a yearly in-person Adult Consumer Survey administered by state Aging, Disability, and Medicaid Agencies (or a state agency-contracted vendor) to a sample of at least 400 individuals in each participating state. NCI-AD data measure the performance of states' long-term services and supports (LTSS) systems and help state agencies with quality improvement initiatives, strategic planning, and legislative and funding prioritization. The project officially launched in mid-2015 with 13 participating states². Currently, the project is in its third year of data collection. The data presented in this report were collected during the project's second year of implementation (2016-2017). For more on the development and history of NCI-AD, refer to the [*National Core Indicators Aging and Disability Adult Consumer Survey: 2015-2016 National Results*](#) report, available on the NCI-AD website (www.NCI-AD.org)

NCI-AD Survey

Survey Overview

The NCI-AD Adult Consumer Survey is designed to measure outcomes across eighteen broad domains and key areas of concern. These eighteen domains are comprised of approximately 50 core indicators. Indicators are the standard measures used across states to assess the outcomes of services provided to individuals, including employment, respect and rights, service coordination, care

¹ NASUAD is the membership organization for state Aging, Disability, and Medicaid directors.

² Colorado, Delaware, Georgia, Indiana, Kansas, Maine, Minnesota, Mississippi, New Jersey, North Carolina, Ohio, Tennessee, and Texas.

coordination, choice, and health and safety. An example of an indicator for Service Coordination is: “Proportion of people who receive the services that they need.”

While most indicators correspond to a single survey question, a few refer to clusters of related questions. For example, the Access indicator that measures “Proportion of people who get needed equipment, assistive devices” is measured by several survey questions that ask about the person’s need for various equipment and devices. The following Figure 1 details NCI-AD domains and corresponding indicators.

Figure 1. NCI-AD Domains and indicators

Domain	NCI-AD Indicator
Community Participation	Proportion of people who are able to participate in preferred activities outside of home when and with whom they want
Choice and Decision Making	Proportion of people who are involved in making decisions about their everyday lives including where they live, what they do during the day, the staff that supports them and with whom they spend time
Relationships	Proportion of people who are able to see or talk to their friends and families when they want to
Satisfaction	Proportion of people who are satisfied with where they live
	Proportion of people who are satisfied with what they do during the day
	Proportion of people who are satisfied with staff who work with them
Service Coordination	Proportion of people who know who to call with a complaint, concern, or question about their services
	Proportion of people whose CM talks to them about any needs that are not being met
	Proportion of people who can get in contact with their CM when they need to
	Proportion of people who receive the services that they need
	Proportion of people finding out about services from service agencies
	Proportion of people who want help planning for future need for services
	Proportion of people who have an emergency plan in place

Domain	NCI-AD Indicator
	Proportion of people who use a relative as their support person
	Proportion of people who have a backup plan if their support person doesn't show up
Care Coordination	Proportion of people discharged from the hospital or LTC facility who felt comfortable going home
	Proportion of people making a transition from hospital or LTC facility who had adequate follow-up
	Proportion of people who know how to manage their chronic conditions
Access	Proportion of people who have adequate transportation
	Proportion of people who get needed equipment, assistive devices (wheelchairs, grab bars, home modifications, etc.)
	Proportion of people who have access to information about services in their preferred language
Safety	Proportion of people who feel safe at home
	Proportion of people who feel safe around their staff/ caregiver
	Proportion of people who feel that their belongings are safe
	Proportion of people whose fear of falling is managed
	Proportion of people who are able to get to safety quickly in case of an emergency
Health Care	Proportion of people who have been to the ER in the past 12 months
	Proportion of people who have had needed health screenings and vaccinations in a timely manner (e.g., vision, hearing, dental, etc.)
	Proportion of people who can get an appointment their doctor when they need to
	Proportion of people who have access to mental health services when they need them
Wellness	Proportion of people in poor health
	Proportion of people with unaddressed memory concerns
	Proportion of people with poor hearing
	Proportion of people with poor vision
	Proportion of people who have a chronic psychiatric or mental health diagnosis
	Proportion of people who often feel sad or depressed

Domain	NCI-AD Indicator
	Proportion of people who have a chronic condition
Medications	Proportion of people taking medications that help them feel less sad/depressed
	Proportion of people who know what their medications are for
Rights and Respect	Proportion of people whose basic rights are respected by others
	Proportion of people whose staff/worker/caregiver treat them with respect
Self-Direction of Care	Proportion of people self-directing
	Proportion of people who can choose or change the kind of services they receive and who provides them
Work	Proportion of people who have a paid job
	Proportion of people who would like a job
	Proportion of people who have had job search assistance
	Proportion of people who volunteer
	Proportion of people who would like to volunteer
Everyday Living	Proportion of people who have adequate support to perform ADLs (bathing, toileting, taking meds, etc.) and IADLs (cleaning, laundry, etc.)
	Proportion of people who have access to healthy foods
Affordability	Proportion of people who have ever had to cut back on food because of money
Planning for future	Proportion of people who want help planning for future need for services
Control	Proportion of people who feel in control of their lives

Survey Organization

The NCI-AD Adult Consumer Survey consists of a pre-survey form, a background information section, the in-person interview questions, and an interviewer feedback form. An additional Proxy Version of the survey is available for surveys conducted only with a proxy respondent. Each is described below.

Pre-Survey Information: This form has questions that help the interviewer prepare for the meeting. Pre-Survey data are not received by the NCI-AD project team, are not analyzed, and thus are not included in this report. The Pre-Survey form is for interviewer use only.

Background Information: This section consists of questions about the consumer's demographics, residence, and services and supports. Data are generally collected from state records, case managers, or a combination of both. When information is not available or is incomplete, the interviewer is responsible for collecting the missing Background Information items at the end of the interview.

In-person Consumer Survey: This section includes all questions comprising the full in-person interview. The survey is organized into thematic sub-sections with related questions grouped together (e.g., questions about employment are in the same section; questions about the home are in a separate section, etc.). The in-person section is completed one-on-one with the person receiving services, whenever possible. The respondent may ask for assistance answering certain questions through the help of a proxy respondent (e.g. family member or close friend) if needed. While the full in-person survey includes both subjective and objective questions, the proxy may only assist with answering a pre-determined subset of more objective items.

Proxy Version: This version of the survey is used when the person receiving services is unable to complete *any* of the survey or has asked a proxy to complete the survey on their behalf. This version includes only the pre-determined subset of more objective survey questions that may be answered by a proxy respondent. Questions in the proxy version are rephrased to reflect that they are about the individual receiving services and not the proxy respondent.

Interviewer Feedback form: This form is completed by the surveyor after the interview is finished to record information such as length and place of the meeting, respondent's ability to answer the questions, if others were present during the interview, any problematic questions encountered, and general feedback for the NCI-AD project team.

NCI-AD in Oregon

The Oregon Department of Human Services Aging and Disabilities program, in partnership with NASUAD and HSRI, implemented the 2016-2017 NCI-AD Adult Consumer Survey in Oregon. APD funded participation to have a source of consumer feedback on LTSS services, service quality and delivery. This first year of NCI-AD in Oregon provides a baseline so that Oregon can measure change over time. Data will be shared with stakeholders and used in assessing services and planning future services and supports. While only people receiving Medicaid-paid long-term services and supports were surveyed this year, future surveys will include people receiving OAA funded services and services through a state funded, non-Medicaid, limited in-home services program called Oregon Project Independence. Oregon contracted with Vital Research for this year and expects to continue with Vital Research for survey implementation for the next five years.

Sample

The total number of NCI-AD Adult Consumer Surveys conducted in Oregon and included for analysis in 2016-2017 was 589 (Total N=589). Three program populations were included in the survey sample and are detailed below.

Community First Choice - Medicaid State Plan, HCBS (1915 K): This program provides a broad range of services and support to people ages 65 and older and to people ages 18-64 who have a physical disability, qualify financially for Medicaid, require the assistance of a paid caregiver (does not have natural support to meet needs) and meet a minimum level of care needs such that they would be eligible for nursing facility services, although once eligible they have a choice of in-home care, community based facility care or a nursing facility. Four hundred thirty-six participants (N=436) from this program were included in the sample, comprising five different settings (in-home, Adult Foster Homes, Residential Care Facilities, Residential Care Facilities with dementia contracts, and Assisted Living Facilities). This report presents results for each setting.

Nursing Facilities - Medicaid State Plan: Nursing Facility services are authorized under the Medicaid State plan for individuals aged 21 and older. They provide long-term care services to individuals who are financially eligible for Medicaid, are disabled and require the level of care provided by a nursing facility. NFs provide a wide array of services, which may vary by facility, however, Federal

regulations require that all facilities provide a minimum set of services including: nursing and related services, specialized rehabilitative services (treatment and services required by residents with mental illness or intellectual disability, not provided or arranged for by the state), medically-related social services, pharmaceutical services (with assurance of accurate acquiring, receiving, dispensing, and administering of drugs and biologicals), dietary services individualized to the needs of each resident, professionally directed program of activities to meet the interests and needs for the well-being of each resident, emergency dental services (and routine dental services to the extent covered under the state plan), room and bed maintenance services, and routine personal hygiene items and services. Eighty-one (N=81) participants were included in the sample.

Program of All-Inclusive Care for the Elderly (PACE): This program is funded through Medicare and Medicaid. It serves individuals who are 55 years of age and older who require nursing home level of care. Each PACE participant receives customized care that is planned and delivered by a coordinated, interdisciplinary team (IDT) of professionals working at the center. The team meets regularly with each participant and his or her representative in order to assess the participant's needs. A participant's care plan usually integrates some home care services from the team with several visits each week to the PACE center, which serves as the hub for medical care, rehabilitation, social activities and dining. PACE services include: round-the-clock services, home care, homemaker services, chore services, home health aide services, adult day health care services, personal emergency response system, home modification, durable medical equipment, transportation, IDT, social services, respite, home delivered meals, and an assisted living program. Individuals in this sample had six months of continuous PACE enrollment and were still enrolled in July 2016. Seventy-two people (N=72) from this program were included in the sample.

Figure 2 below summarizes programs and settings included in Oregon's analysis sample, the number of survey-eligible service recipients in each and the corresponding number of conducted surveys included for analysis. Also included are calculations of margin of error for each program and setting under two scenarios: assuming 0.5 distribution of responses and assuming 0.7 distribution of responses. Using the 0.5 distribution of responses is the most conservative assumption one can make when calculating margins of error and is usually used when no prior information is available at all about population proportions. When prior evidence exists about likely distributions of proportions or averages in the population, those proportions can be used in calculating less conservative margins of error. Based on distributions observed in data collected so far, it is reasonable to assume a

less conservative population proportion (response distribution) of 0.7 for calculating margins of error. Both scenarios use all completed surveys included for analysis as sample setting N in the calculations. Readers should be aware that for some survey items, the actual number of valid responses may be smaller than the total number of completed surveys. This is explained in more detail in “Organization of Results” section below.

Figure 2. Programs and settings included, number of surveys included for analysis, and margins of error

Setting	Number of surveys	Number of eligible participants	Margin of error and confidence level for estimate (using 0.5 distribution)	Margin of error and confidence level for estimate (using 0.7 distribution)
Community First Choice: In-home	120	15,438	95% Confidence Level, 8.9% Margin of Error	95% Confidence Level, 8.2% Margin of Error
Community First Choice: Adult Foster Homes	81	2,945	95% Confidence Level, 10.7% Margin of Error	95% Confidence Level, 9.8% Margin of Error
Community First Choice: Residential Care Facilities	76	1,387	95% Confidence Level, 10.9% Margin of Error	95% Confidence Level, 10.0% Margin of Error
Community First Choice: Residential Care Facilities with Dementia Contracts	70	2,075	95% Confidence Level, 11.5% Margin of Error	95% Confidence Level, 10.6% Margin of Error
Community First Choice: Assisted Living Facilities	89	4,459	95% Confidence Level, 10.3% Margin of Error	95% Confidence Level, 9.4% Margin of Error
Nursing Facilities	81	3,637	95% Confidence Level, 10.8% Margin of Error	95% Confidence Level, 9.9% Margin of Error
PACE	72	1,165	95% Confidence Level, 10.7% Margin of Error	95% Confidence Level, 10.7% Margin of Error
Total	589	31,106	95% Confidence Level, 4.0% Margin of Error	95% Confidence Level, 3.7% Margin of Error

Survey Process in Oregon

APD contracted with Vital Research, a national survey group, to hire and manage local interviewers to conduct the NCI-AD in-person survey. Oregon worked with Vital Research to identify and train at least sixteen individuals to be interviewers. APD, the Oregon Office of Adult Abuse Prevention and Investigations, Vital Research, NASUAD, and HSRI staff conducted a two-day training with these interviewers on March 22-23, 2017. The training consisted of a detailed review of the NCI-AD survey tool, general and population-specific surveying techniques, procedures for scheduling interviews and obtaining written consent, overview of the NCI-AD project, recognition of abuse, guidance for follow-up in the case of unmet needs and/or abuse, neglect or exploitation, mock interviewing practice sessions, and data entry procedures. Interviews began the week of March 26, 2017 and the final data from 635 interviews was sent to HSRI on June 16, 2017. While data from 635 interviews was sent to HSRI, only 589 were included in the final results. Data were discarded if the surveyor marked the consumer may not have understood questions or if the need for a proxy was indicated but the proxy questions were left blank. APD will work with Vital to decrease the number of discarded surveys in future surveys.

Oregon elected to add 8 state-specific questions to the main NCI-AD in-person survey.

Stakeholders

Before the survey was launched, APD shared information about the survey with the Oregon Association of Area Agencies on Aging, the Oregon Office of the Long Term Care Ombudsman, consumers in the entire sample pool, facility providers of consumers in the sample pool, guardians of consumers and client representatives and APD and AAA field offices.

The results of the survey will be shared with stakeholders through a public meeting and posting on publicly available website(s). Agency staff presentations were completed. Community and other boards or commission presentations are under consideration.

The need for further communication of the first-year results and future surveys will be assessed and plans made accordingly.

Organization of Results

The following section of the report presents findings from Oregon’s 2016-17 NCI-AD data collection cycle. Results are grouped by domain and are presented in chart format. Charts show collapsed data broken out by each of the programs and settings, as well as the Oregon state average. The numbers of people in each program/setting that responded to the item, as well as the number for the state as a whole are also shown. For rules on collapsing response options, please refer to Appendix A.

The Ns (number of respondents for each individual program/setting and the state) shown in each chart are the number of valid responses to that survey item. That number may be smaller than the total number of completed surveys for several reasons:

- Certain questions in the survey could only be asked of the service recipient – i.e. no proxy respondents were allowed for those questions. As the number of completed surveys includes both the full in-person surveys and the proxy surveys, these questions were only asked in the full in-person survey and thus have a smaller number of respondents.
- Only valid responses were included in both denominator and numerator. The Ns also represent the number of valid responses only. Unclear, refused and, unless otherwise stated, “don’t know” responses were excluded.
- The survey contains several skip logic patterns. This means that depending on the response to a previous survey item, a question may or may not be asked, as appropriate. When a question is skipped due to skip logic, that survey case does not contribute to the calculations for the item and does not contribute to the N.

Oregon state average is a weighted state estimate. A weighted estimate is needed because Oregon oversampled some of its programs and settings – i.e. some programs and settings constituted a larger proportion of the sample than they did as proportion of total population receiving services in the state. To account for these programs and settings being proportionally over-represented in the state’s sample, statistical weights were developed and applied when estimating state averages. Applying these weights, in effect, “re-balances” the disproportionate representation of programs and settings in the sample, and results in a state estimate that one would expect if they were sampled proportionately relative to the populations they serve. For exact calculations of state weights please contact the NCI-AD project team.

Un-collapsed and unweighted data showing all categories of responses by program and setting, as well as Oregon’s analysis sample overall, are shown in tabular format in Appendix B. Please note, the “sample average” in Appendix B is a simple average and is different from the state average shown in the charts, as it presents unweighted data (i.e. no weights that account for disproportionate sampling of programs and settings have been applied in Appendix B).

Oregon’s state-specific questions the state chose to add to the main NCI-AD in-person survey are shown in Appendix C.

Limitations of Data

This report contains survey results related to the quality and impact of LTSS in Oregon. However, the report does not include benchmarks for acceptable or unacceptable levels of performance for programs, settings or the state overall. Rather, it is up to stakeholders to assess the information contained in this report and draw conclusions. This report is intended to be one mechanism for state leaders and community stakeholders to assess the current state of Oregon’s LTSS system and identify areas that are working well and areas that could use improvement. The results charts throughout this report display program and setting scores relative to one another and to Oregon state average. It is up to public managers, policy-makers, and other stakeholders to decide whether a program’s or a setting’s result relative to the state average suggests that intervention or further investigation are necessary. Furthermore, by aligning NCI-AD measures with specific state and federal initiatives, Oregon can more accurately demonstrate the areas in which transformation is evident and continue to promote quality efforts, while also recognizing limitations and ongoing challenges.

Extreme caution should be exercised when interpreting results where the item sample size is small. Valid item Ns for each program and setting are shown in every chart and table. Anytime the sample size is smaller than 20 in the charts, the N is also asterisked. It is advised that in these cases the data are treated as suggestive and informational only, and not used for drawing firm conclusions.

In addition, discretion should be used when comparing a program’s or a setting’s result relative to another due to potential similarities and differences amongst the participants.

Community Participation

People are able to participate in preferred activities outside of home when and with whom they want.

There is one Community Participation indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are able to participate in preferred activities outside of home when and with whom they want.

There are three survey items that correspond to the Community Participation domain.

Un-collapsed data are shown in Appendix B.

Graph 1. Proportion of people who are as active in the community as they would like to be³.

Graph 2. Proportion of people who have tried to leave the house to go somewhere in the past week and have not been able to⁴.

³ New variable

⁴ New variable

Choice and Decision Making

People are involved in making decisions about their everyday lives and with whom they spend their time.

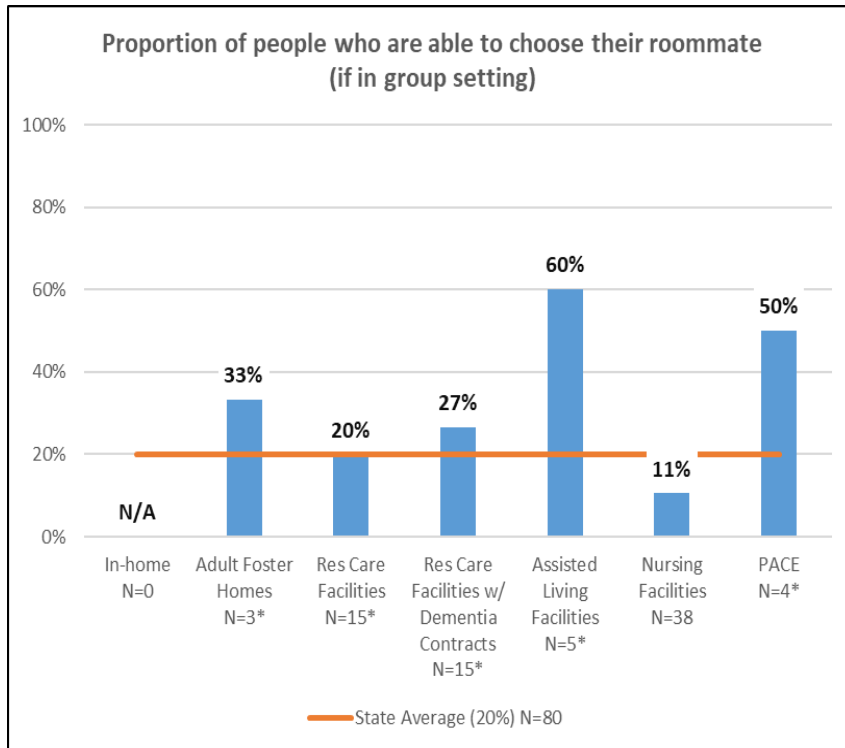

There is one Choice and Decision-Making indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are involved in making decisions about their everyday lives including where they live, what they do during the day, the staff that supports them and with whom they spend time

There are four survey items that correspond to the Choice and Decision-Making domain.

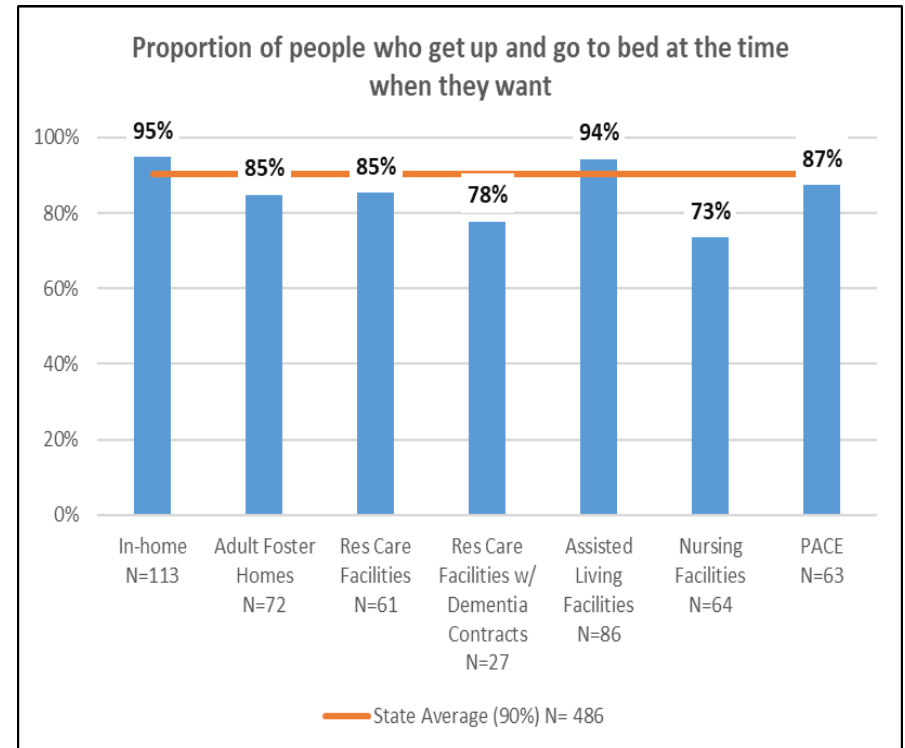

Un-collapsed data are shown in Appendix B.

Graph 3. Proportion of people who are able to choose their roommate (if in group setting)

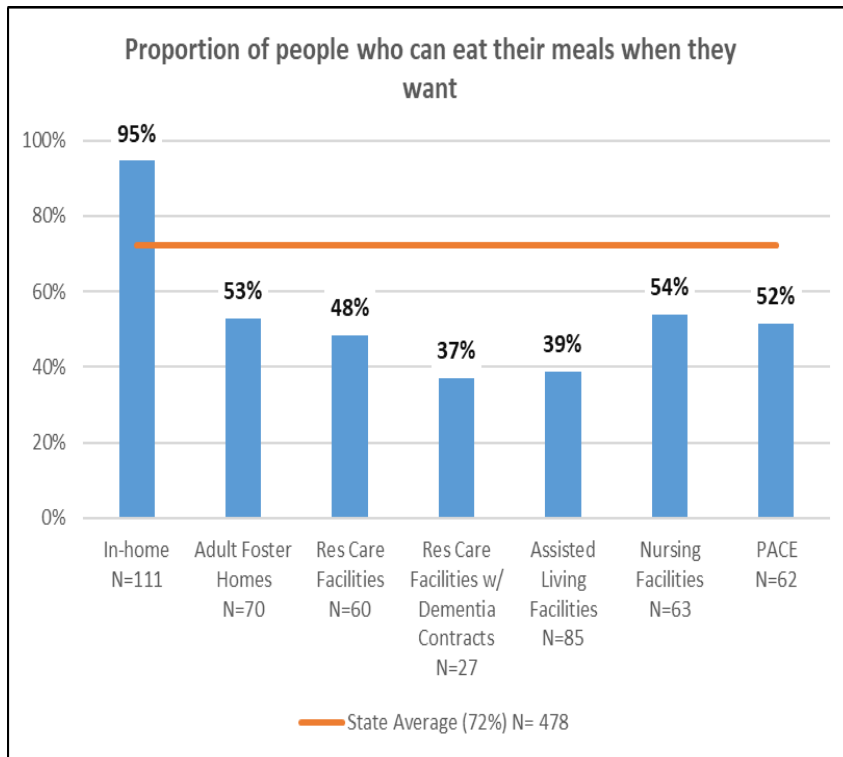

* Very small number of responses

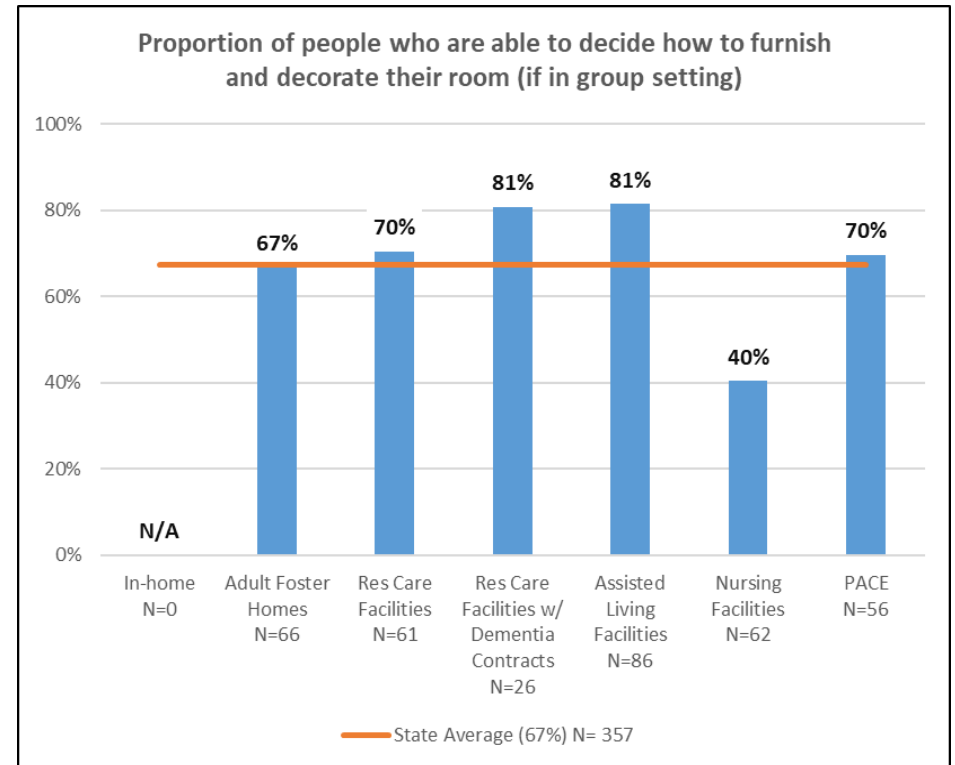

Graph 4. Proportion of people who get up and go to bed at the time when they want

Graph 5. Proportion of people who can eat their meals when they want

Graph 6. Proportion of people who are able to decide how to furnish and decorate their room (if in group setting)

Relationships

People have friends and relationships and do not feel lonely.

There is one Relationship indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are able to see or talk to their friends and families when they want to.

There are two survey items that correspond to the Relationship domain.

Un-collapsed data are shown in Appendix B.

Graph 7. Proportion of people who can always or almost always see or talk to friends and family when they want to (if there are friends and family who do not live with person)

Satisfaction

People are satisfied with their everyday lives – where they live, who works with them, and what they do during the day.

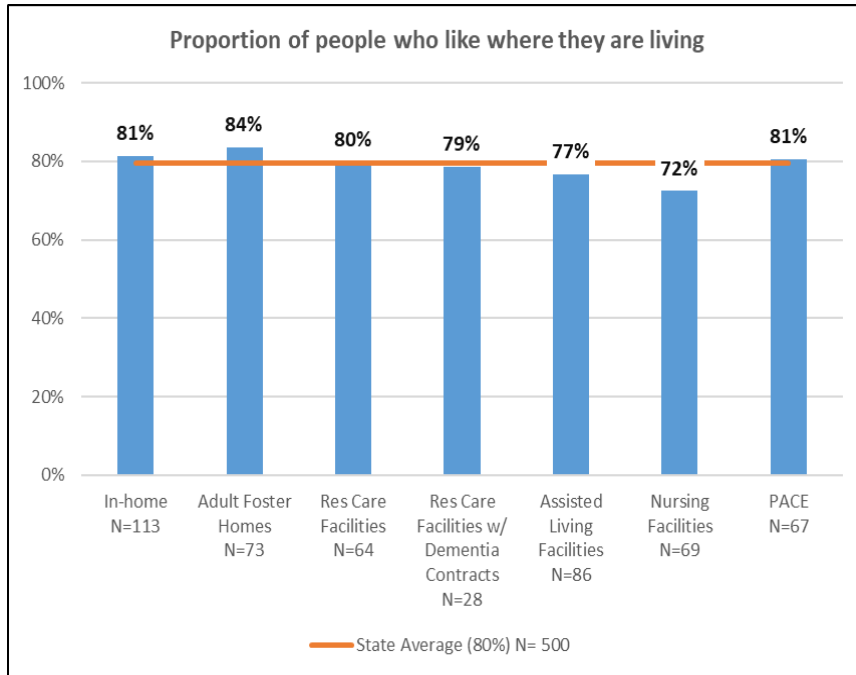

There are three Satisfaction indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are satisfied with where they live.
2. Proportion of people who are satisfied with what they do during the day.
3. Proportion of people who are satisfied with staff who work with them.

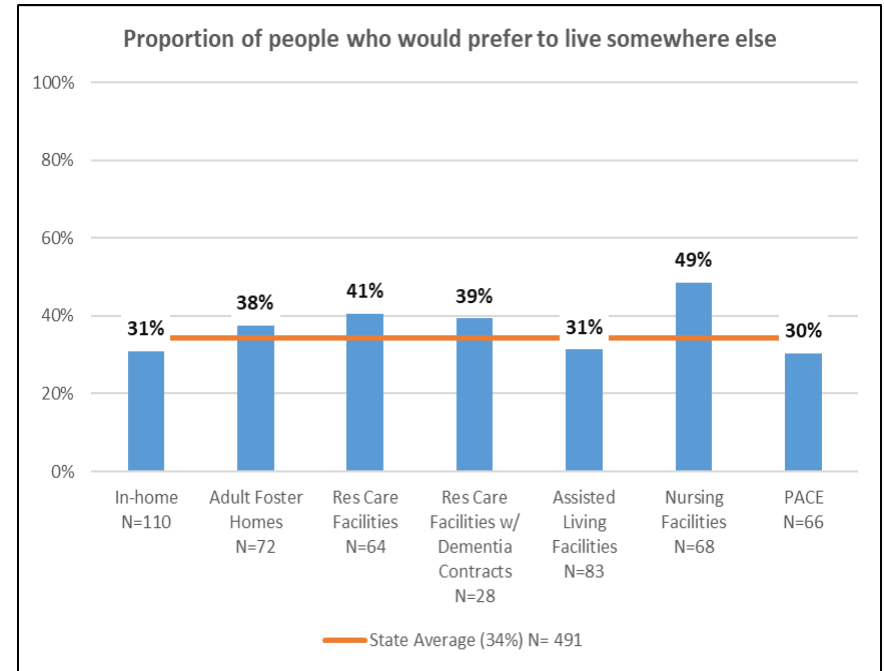

There are seven survey items that correspond to the Satisfaction domain.

Un-collapsed data are shown in Appendix B.

Graph 8. Proportion of people who like where they are living

Graph 9. Proportion of people who would prefer to live somewhere else

Graph 10. Proportion of people who always like how they usually spend their time during the day⁵

Graph 11. Proportion of people whose paid support staff change too often⁶

⁵ In 2015-2016 reporting cycle, "sometimes" was combined with "always"

⁶ In 2015-2016 survey cycle, proxies were allowed for this question

Graph 12. Proportion of people whose paid support staff do things the way they want them done

Service Coordination

Service coordinators are accessible, responsive, and support the person's participation in service planning and the person receives needed services.

There are ten Service Coordination indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who know who to call with a complaint, concern, or question about their services
2. Proportion of people whose case manager talks to them about any needs that are not being met
3. Proportion of people who can get in contact with their case manager when they need to
4. Proportion of people who receive the services that they need
5. Proportion of people finding out about services from service agencies⁷
6. Proportion of people who want help planning for future need for services
7. Proportion of people who have an emergency plan in place
8. Proportion of people whose support workers come when they are supposed to
9. Proportion of people who use a relative as their support person
10. Proportion of people who have a backup plan if their support person doesn't show up

There are twelve survey items that correspond to the Service Coordination domain.

Un-collapsed data are shown in Appendix B.

⁷ Data shown in Appendix B only

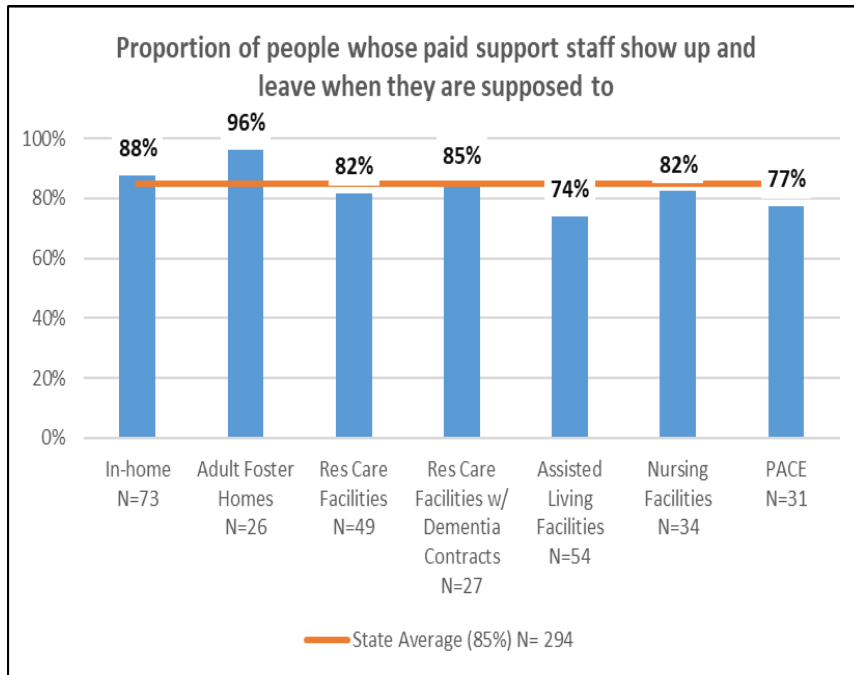

Graph 13. Proportion of people who know whom to contact if they want to make changes to their services

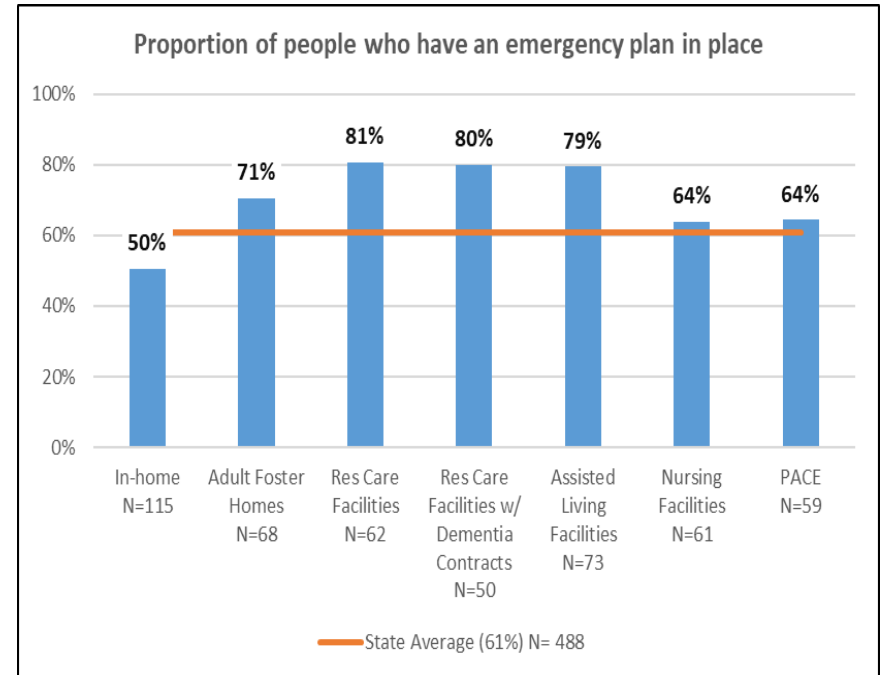

Graph 14. Proportion of people who can reach their case manager/care coordinator when they need to (if know they have case manager/care coordinator)

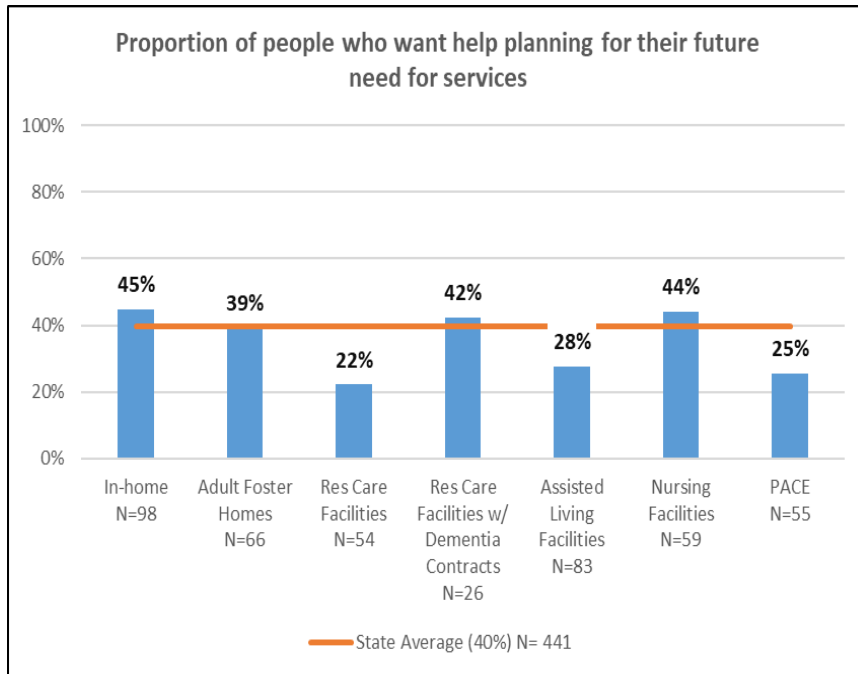

Graph 15. Proportion of people whose paid support staff show up and leave when they are supposed to

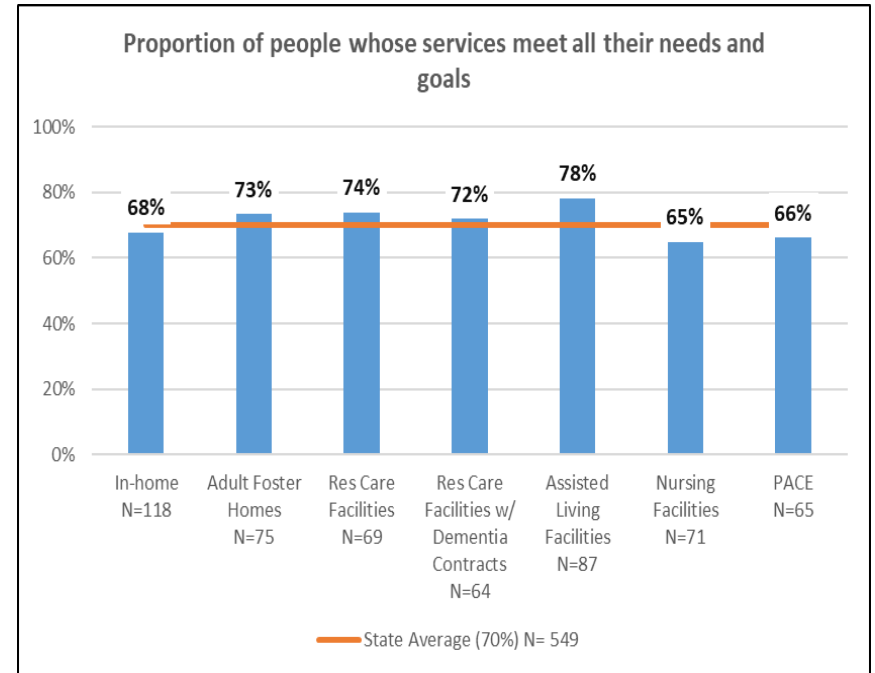

Graph 16. Proportion of people who have an emergency plan in place

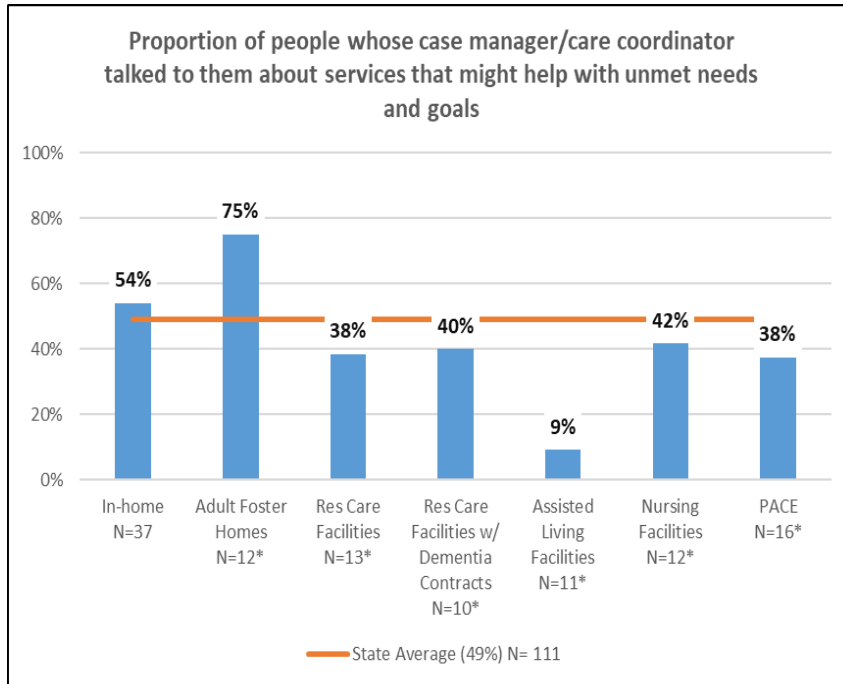

Graph 17. Proportion of people who want help planning for their future need for services

Graph 18. Proportion of people whose services meet all their needs and goals

Graph 19. Proportion of people whose case manager/care coordinator talked to them about services that might help with unmet needs and goals (if have case manager and have unmet needs and goals)

* Very small number of responses

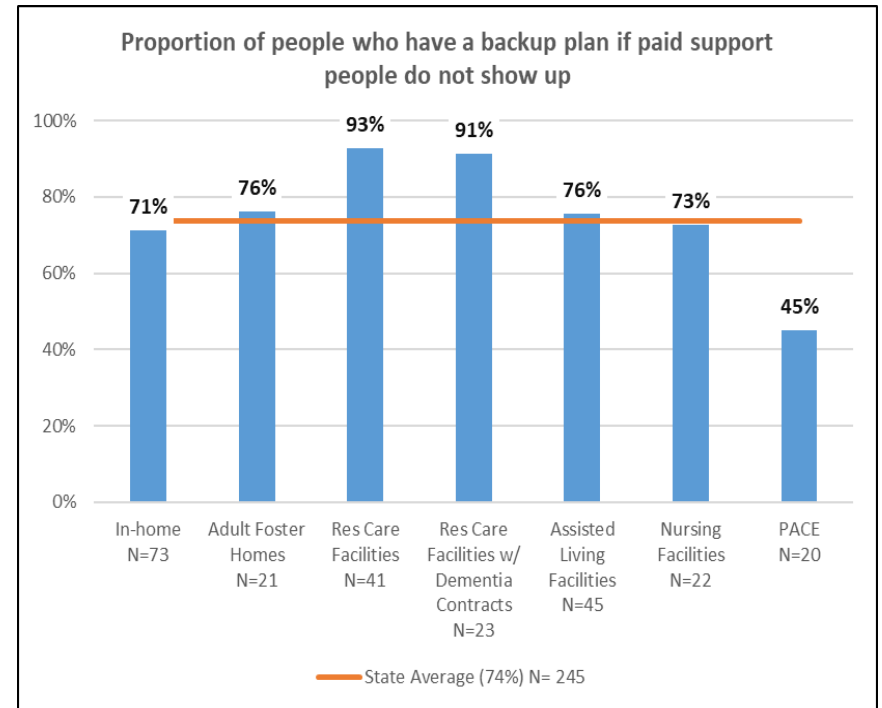

Graph 20. Proportion of people whose family member (unpaid or paid) is the person who helps them most often

Graph 21. Proportion of people whose family member (unpaid or paid) provides additional assistance

Graph 22. Proportion of people who have a backup plan if their paid support people do not show up⁸

⁸ New variable

Care Coordination

Individuals are provided appropriate coordination of care.

There are three Care Coordination indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people discharged from the hospital or LTC facility who felt comfortable going home.
2. Proportion of people making a transition from hospital or LTC facility who had adequate follow-up.
3. Proportion of people who know how to manage their chronic conditions.

There are five survey items that correspond to the Care Coordination domain.

Un-collapsed data are shown in Appendix B.

Graph 23. Proportion of people who stayed overnight in a hospital or rehabilitation facility (and were discharged to go home) in past year

Graph 24. Proportion of people who reported feeling comfortable and supported enough to go home after being discharged from a hospital or rehabilitation facility (if occurred in the past year)

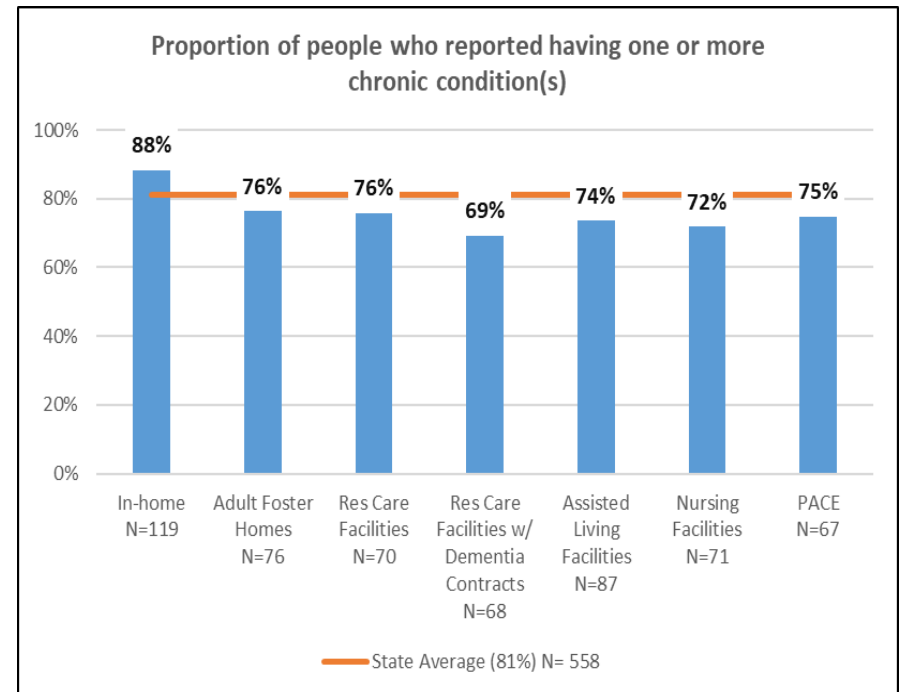

Graph 25. Proportion of people who reported someone followed-up with them after discharge from a hospital or rehabilitation facility (if occurred in the past year)

* Very small number of responses

Graph 26. Proportion of people who reported having one or more chronic condition(s)

Graph 27. Proportion of people who reported they know how to manage their chronic condition(s)

Access

Publicly funded services are readily available to individuals who need and qualify for them.

There are three Access indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have adequate transportation.
2. Proportion of people who get needed equipment, assistive devices (wheelchairs, grab bars, home modifications, etc.)
3. Proportion of people who have access to information about services in their preferred language.

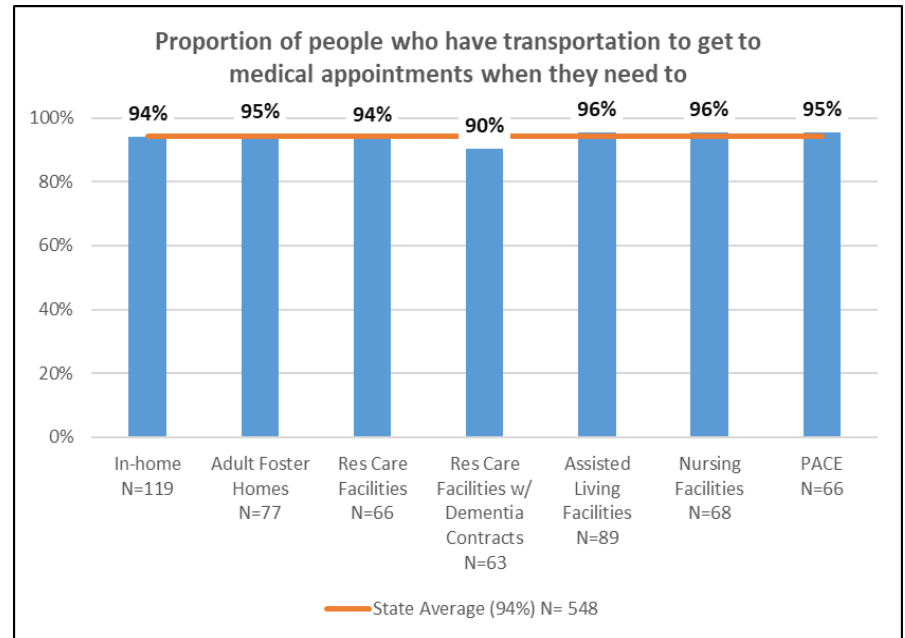

There are five survey items that correspond to the Access domain.

Un-collapsed data are shown in Appendix B.

Graph 28. Proportion of people who have transportation when they want to do things outside of their home

Graph 29. Proportion of people who have transportation to get to medical appointments when they need to

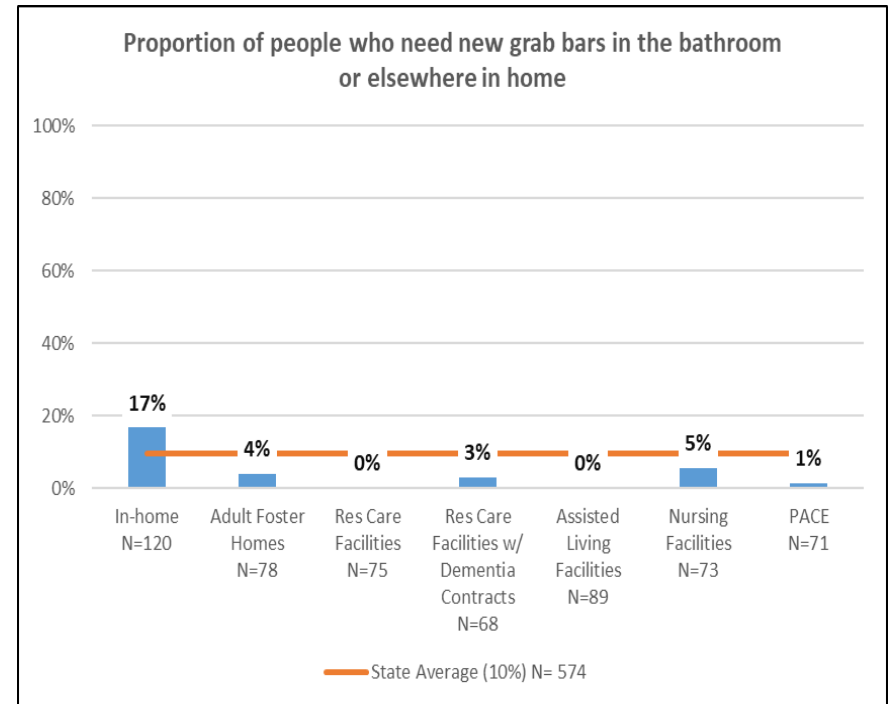

Graph 30. Proportion of people who receive information about their services in the language they prefer (if non-English)

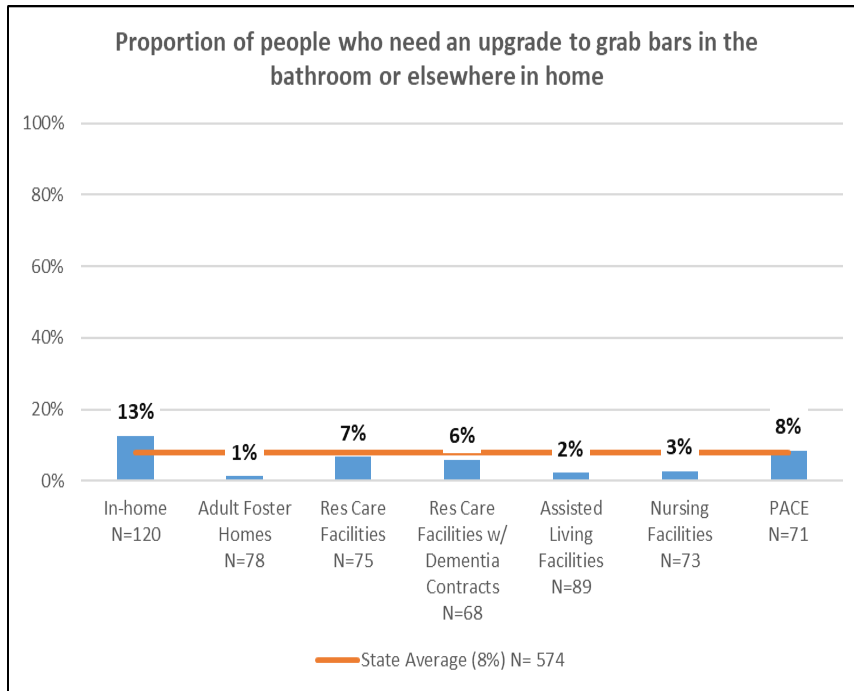

* Very small number of responses

Graph 31. Proportion of people who need new grab bars in the bathroom or elsewhere in home

Graph 32. Proportion of people who need an upgrade to grab bars in the bathroom or elsewhere in home

Graph 33. Proportion of people who need new bathroom modifications (other than grab bars)

Graph 34. Proportion of people who need an upgrade to bathroom modifications (other than grab bars)

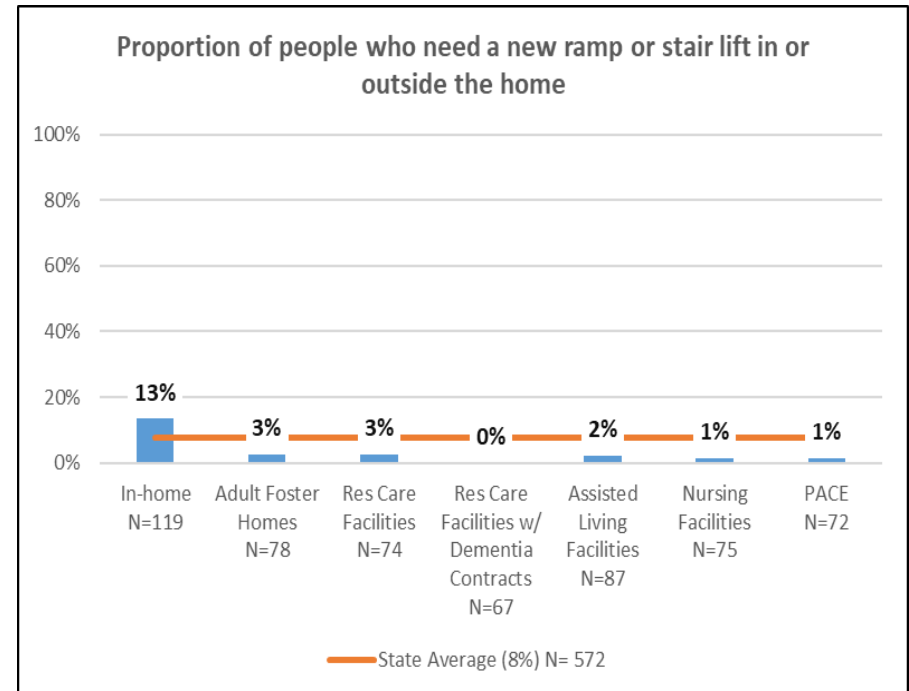

Graph 35. Proportion of people who need a new specialized bed

Graph 36. Proportion of people who need an upgrade to specialized bed

Graph 37. Proportion of people who need a new ramp or stair lift in or outside the home

Graph 38. Proportion of people who need an upgrade to a ramp or stair lift in or outside the home

Graph 39. Proportion of people who need a new remote monitoring system

Graph 40. Proportion of people who need an upgrade to remote monitoring system

Graph 42. Proportion of people who need an upgrade to emergency response system

Graph 43. Proportion of people who need other new home modifications

Graph 44. Proportion of people who need an upgrade to other home modifications

Graph 45. Proportion of people who need a new walker

Graph 46. Proportion of people who need an upgrade to a walker

Graph 47. Proportion of people who need a new scooter

Graph 48. Proportion of people who need an upgrade to a scooter

Graph 49. Proportion of people who need a new cane

Graph 50. Proportion of people who need an upgrade to a cane

Graph 51. Proportion of people who need a new wheelchair

Graph 52. Proportion of people who need an upgrade to a wheelchair

Graph 53. Proportion of people who need new hearing aids

Graph 54. Proportion of people who need an upgrade to hearing aids

Graph 55. Proportion of people who need new glasses

Graph 56. Proportion of people who need an upgrade to glasses

Graph 57. Proportion of people who need a new communication device

Graph 58. Proportion of people who need an upgrade to a communication device

Graph 59. Proportion of people who need other new assistive devices

Graph 60. Proportion of people who need an upgrade to other assistive devices

Safety

People feel safe from abuse, neglect, and injury.

There are five Safety indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who feel safe at home.
2. Proportion of people who feel safe around their staff/ caregiver.
3. Proportion of people who feel that their belongings are safe.
4. Proportion of people whose fear of falling is managed.
5. Proportion of people who are able to get to safety quickly in case of an emergency.

There are seven survey items that correspond to the Safety domain.

Un-collapsed data are shown in Appendix B.

Graph 61. Proportion of people who feel safe at home

Graph 62. Proportion of people who feel safe around their paid support staff

* Very small number of responses

Graph 63. Proportion of people who are ever worried for the security of their personal belongings

Graph 64. Proportion of people whose money was taken or used without their permission in the last 12 months

Graph 65. Proportion of people who have concerns about falling or being unstable (or about whom there are concerns)

Graph 66. Proportion of people with whom somebody talked to or worked with to reduce risk of falling or being unstable (if there are such concerns)

Graph 67. Proportion of people who are able to get to safety quickly in case of an emergency like a fire or a natural disaster

Health Care

People secure needed health services.

There are four Health Care indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have been to the ER in the past 12 months.
2. Proportion of people who have had needed health screenings and vaccinations in a timely manner (e.g., vision, hearing, dental, etc.)
3. Proportion of people who can get an appointment with their doctor when they need to.
4. Proportion of people who have access to mental health services when they need them.

There are four survey items that correspond to the Health Care domain.

Un-collapsed data are shown in Appendix B.

Graph 68. Proportion of people who have gone to the emergency room for any reason in the past year⁹

Graph 69. Proportion of people whose one or more visit to the ER in the past year was due to falling or losing balance (if went to ER in past year)¹⁰

⁹ Question restructured

¹⁰ Question restructured

Graph 70. Proportion of people whose one or more visit to the ER in the past year was due to tooth or mouth pain (if went to ER in the past year) ¹¹

Graph 71. Proportion of people who can get an appointment to see their primary care doctor when they need to

¹¹ Question restructured

Graph 72. Proportion of people who have talked to someone about feeling sad and depressed during the past 12 months (if feeling sad and depressed)

* Very small number of responses

Graph 73. Proportion of people who have had a physical exam or wellness visit in the past year

Graph 74. Proportion of people who have had a hearing exam in the past year

Graph 75. Proportion of people who have had a vision exam in the past year

Graph 76. Proportion of people who have had a flu shot in the past year

Graph 77. Proportion of people who have had a routine dental visit in the past year

Graph 78. Proportion of people who have had a cholesterol screening in the past five years

Wellness

People are supported to maintain health.

There are seven Wellness indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people in poor health.
2. Proportion of people with unaddressed memory concerns.
3. Proportion of people with poor hearing.
4. Proportion of people with poor vision.
5. Proportion of people who have a chronic psychiatric or mental health diagnosis.
6. Proportion of people who often feel sad or depressed.
7. Proportion of people who have a chronic condition.

There are ten survey items that correspond to the Wellness domain.

Un-collapsed data are shown in Appendix B.

Graph 79. Proportion of people who describe their overall health as poor

Graph 80. Proportion of people who reported their health is much better or somewhat better compared to 12 months ago

Graph 81. Proportion of people who reported they forget things more often than before during the past 12 months

Graph 82. Proportion of people who have discussed (or somebody else discussed) their forgetting things with a doctor or a nurse (if forget things more often during the past 12 months)

Graph 83. Proportion of people who describe themselves as having a chronic psychiatric or mental health diagnosis¹²

Graph 84. Proportion of people who feel sad or depressed at least sometimes or often

¹² New variable

Graph 85. Proportion of people with chronic conditions

Graph 86. Proportion of people who describe their hearing as poor (taking into account hearing aids, if any)¹³

¹³ New variable

Graph 87. Proportion of people who describe their vision as poor (taking into account glasses or contacts, if any)¹⁴

¹⁴ New variable

Graph 88. Proportion of people who describe themselves as having a physical disability¹⁵

¹⁵ New variable

Medications

Medications are managed effectively and appropriately.

There are two Medication indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people taking medications that help them feel less sad/depressed.
2. Proportion of people who know what their medications are for.

There are two survey items that correspond to the Medication domain.

Un-collapsed data are shown in Appendix B.

Graph 89. Proportion of people who take medications that help them feel less sad or depressed

Graph 90. Proportion of people who understand what their prescription medications are for (if take prescription medications)

Rights and Respect

People receive the same respect and protections as others in the community.

There are two Rights and Respect indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people whose basic rights are respected by others.
2. Proportion of people whose staff/worker/caregiver treat them with respect.

There are eight survey items that correspond to the Rights and Respect domain.

Un-collapsed data are shown in Appendix B.

Graph 91. Proportion of people who feel that their paid support staff treat them with respect

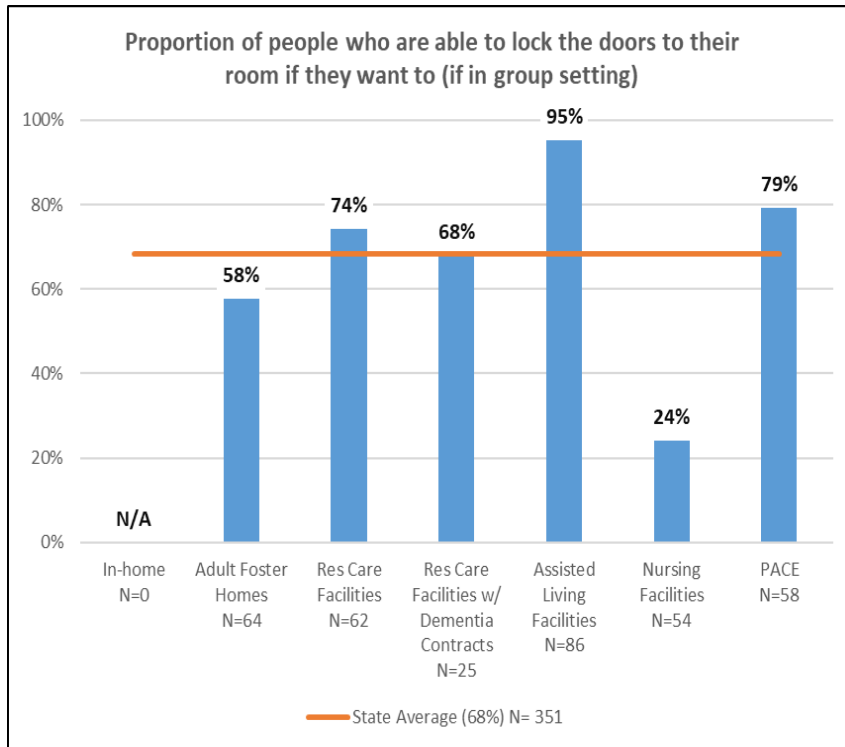

Graph 92. Proportion of people who report that others ask permission before entering their home/room (if in group setting)¹⁶

¹⁶ In 2015-2016, this question was asked of everyone; now in group setting only

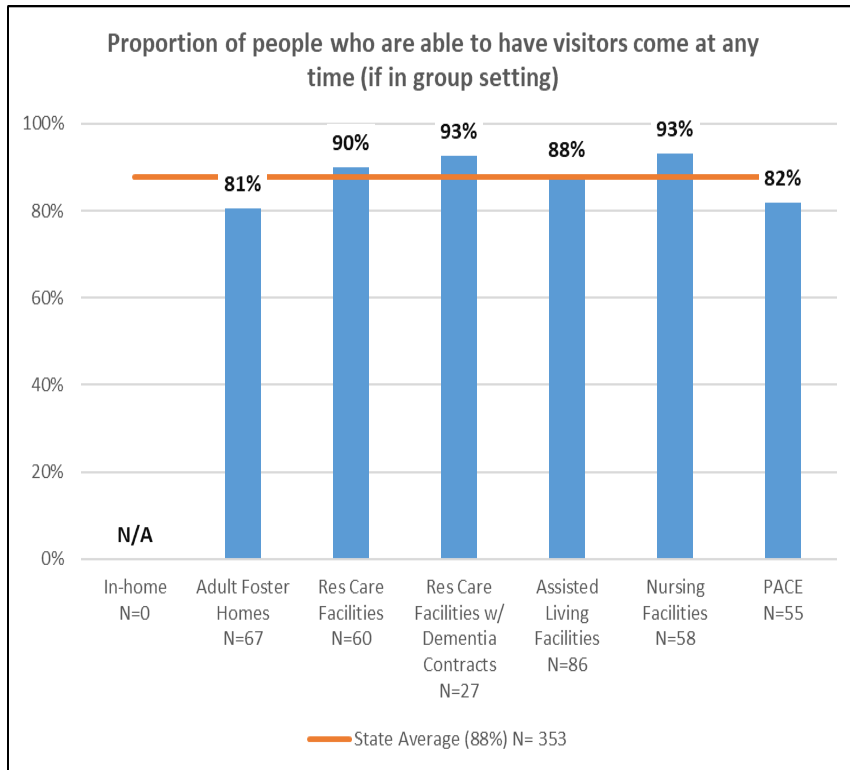

Graph 93. Proportion of people who are able to lock the doors to their room if they want to (if in group setting)

Graph 94. Proportion of people who have enough privacy in their home (if in group setting)

Graph 95. Proportion of people who are able to have visitors come at any time (if in group setting)

Graph 96. Proportion of people who can use the phone privately whenever they want to (if in group setting)

Graph 97. Proportion of people who have access to food at all times of day (if in group setting)

Graph 98. Proportion of people whose mail or email is read without asking them first (if in group setting)

* Very small number of responses

Self-Direction of Care

People have authority and are supported to direct and manage their own services.

There are two Self-Direction of Care indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people self-directing.
2. Proportion of people who can choose or change the kind of services they receive and who provides them.

There are four survey items that correspond to the Self-Direction of Care domain. Proportion of people self-directing is derived from state administrative records.

Un-collapsed data are shown in Appendix B.

Graph 99. Proportion of people who are participating in a self-directed supports option (as defined by their State—data for this indicator come directly from State administrative records)

Graph 100. Proportion of people who can choose or change what kind of services they get¹⁷

¹⁷ New variable

Graph 101. Proportion of people who can choose or change how often and when they get services¹⁸

Graph 102. Proportion of people who can change their paid support staff¹⁹

¹⁸ New variable

¹⁹ New variable

Work

People have support to find and maintain community integrated employment if they want it.

There are five Work indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have a paid job.
2. Proportion of people who would like a job.
3. Proportion of people who have had job search assistance.
4. Proportion of people who volunteer.
5. Proportion of people who would like to volunteer.

There are five survey items that correspond to the Work domain.

Un-collapsed are shown in Appendix B.

Graph 103. Proportion of people who have a paying job in the community

Graph 104. Proportion of people who would like a job (if not currently employed)

Graph 105. Proportion of people who reported that someone has talked to them about job options (if wanted a job)

* Very small number of responses

Graph 106. Proportion of people who do volunteer work

Graph 107. Proportion of people who would like to do volunteer work (if not currently volunteering)²⁰

²⁰ New variable

Everyday Living

People have enough supports for everyday living.

There are two Everyday Living indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have adequate support to perform activities of daily living (bathing, toileting, taking meds, etc.) and instrumental activities of daily living (cleaning, laundry, etc.)
2. Proportion of people who have access to healthy foods.

There are five survey items that correspond to the Everyday Living domain.

Un-collapsed data are shown in Appendix B.

Graph 108. Proportion of people who generally need a lot or some assistance with everyday activities (things like preparing meals, housework, shopping or taking their medications)

Graph 109. Proportion of people who always get enough assistance with everyday activities when they need it (if need any assistance) (things like preparing meals, housework, shopping or taking their medications)

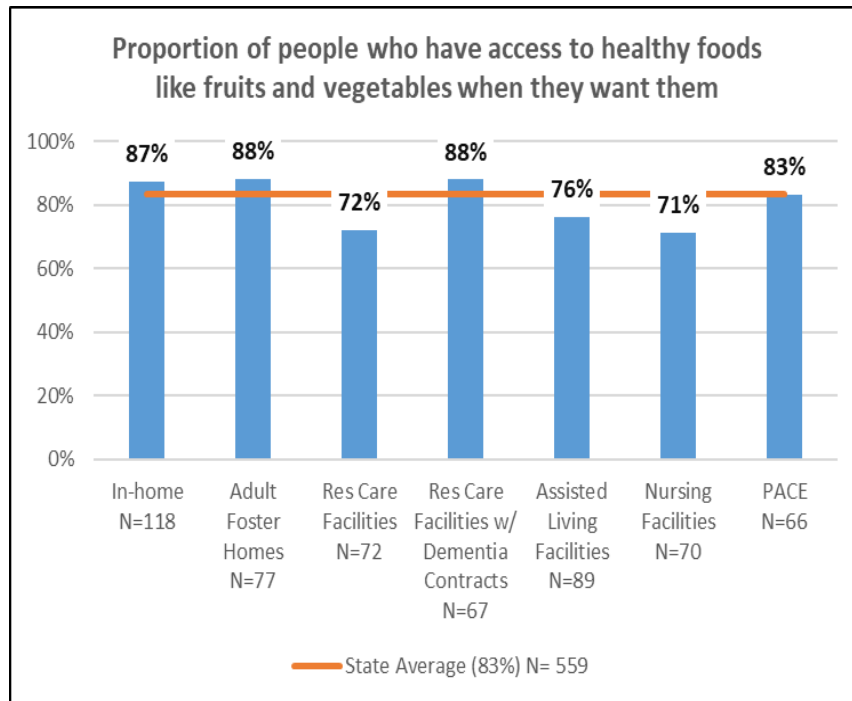

Graph 110. Proportion of people who generally need a lot or some assistance for self-care (things like bathing, dressing, going to the bathroom, eating, or moving around their home)

Graph 111. Proportion of people who always get enough assistance with self-care when they need it (if need any assistance) (things like bathing, dressing, going to the bathroom, eating, or moving around their home)

Graph 112. Proportion of people who have access to healthy foods like fruits and vegetables when they want them

Affordability

People have enough available resources.

There is one Affordability indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have ever had to cut back on food because of money.

There is one survey item that corresponds to the Affordability domain.

Un-collapsed data are shown in Appendix B.

Graph 113. Proportion of people who ever have to skip a meal due to financial worries

Planning for future

People have support to plan and make decision about the future.

There is one Planning for Future indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who want help planning for future need for services.

There is one survey item that corresponds to the Planning for Future domain.

Un-collapsed data are shown in Appendix B.

Graph 114. Proportion of people who want help planning for their future need for services

Control

People feel in control of their lives

There is one Control indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who feel in control of their lives.

There is one survey item that corresponds to the Control domain.

This section also includes presentation of results on a ranking of what is most important to people surveyed²¹.

Un-collapsed data are shown in Appendix B.

²¹ Data shown in Appendix B only

Graph 115. Proportion of people who never feel in control of their life

Appendix A: Rules for Recoding and Collapsing Responses

Table A1 below details collapsing and recoding logic for items that were measured using anything other than a “Yes/No” binary response. The number in the third column refers to the graph number in the report where the item can be found. Unless otherwise stated, “don’ know” and “unclear/refused” responses are excluded from both numerator and denominator.

Table A1. Outcome Variables – Collapsing Rules

Domain	Item	Graph #	Recoding/Collapsing Logic
Community Participation	Proportion of people who are as active in the community as they would like to be	1	Collapse “No” and “Sometimes”
Choice and Decision Making	Proportion of people who get up and go to bed at the time they want	4	Collapse “Some days, sometimes” and “No, never”
	Proportion of people who can eat their meals when they want	5	Collapse “Some days, sometimes” and “No, never”
	Proportion of people who are able to decide how to furnish and decorate their room (if in group setting)	6	Collapse “In most ways” and “Only in some ways, or not at all”
Relationships	Proportion of people who can always or almost always see or talk to friends and family when they want to (if there are friends and family who do not live with person)	7	Collapse “Most of the time, usually, or some family and/or friends” and “No, or rarely”
Satisfaction	Proportion of people who like where they are living	8	Collapse “In-between, most of the time” and “No”
	Proportion of people who would prefer to live somewhere else	9	Collapse “Yes” and “Maybe”
	Proportion of people who like how they usually spend their time during the day	10	Collapse “Some days, sometimes” and “No, never”
	Proportion of people whose paid support staff change too often	11	Collapse “Yes” and “Some, or sometimes”
	Proportion of people whose paid support staff do things the way they want them done	12	Collapse “Some, or usually” and “No, never or rarely”
Service Coordination	Proportion of people who know whom to contact if they want to make changes to their services	13	Collapse “Not sure, maybe” and “No”
	Proportion of people who can reach their case manager/ care coordinator when they need to (if they know they have a case manager/ care coordinator)	14	Collapse “Most of the time, usually” and “No, or only sometimes”

Domain	Item	Graph #	Recoding/Collapsing Logic
	Proportion of people whose paid support staff show up and leave when they are supposed to	15	Collapse “Some, or usually” and “No, never or rarely”
	Proportion of people whose services meet all their needs and goals	18	Collapse “No, not at all, needs or goals are not met” and “Some needs and goals”
	Proportion of people whose family member (unpaid or paid) is the person who helps them most often	20	Collapse “Paid family member or spouse/partner” and “Unpaid family member or spouse/partner”
	Proportion of people whose family member (unpaid or paid) provides additional assistance	21	Add percentages for “Paid family member or spouse/partner” and “Unpaid family member or spouse/partner”
Care Coordination	Proportion of people who reported feeling comfortable and supported enough to go home after being discharged from a hospital or rehab facility (if occurred in the past year)	24	Collapse “No” and “In-between”
	Proportion of people who reported they know how to manage their chronic conditions	27	Collapse “No” and “In-between, or some conditions”
Access	Proportion of people who have transportation when they want to do things outside of their home	28	Collapse “No” and “Sometimes”
	Proportion of people who have transportation to get to medical appointments when they need to	29	Collapse “No” and “Sometimes”
	Proportion of people who receive information about their services in the language they prefer (if non-English)	30	Collapse “No” and “Some information”
Safety	Proportion of people who have concerns about falling or being unstable (or about whom there are concerns)	65	Collapse “Yes, often” and “Sometimes”
Health Care	Proportion of people who can get an appointment to see their primary care doctor when they need to	71	Collapse “Usually” and “No, rarely”
Wellness	Proportion of people who describe their overall health as poor	79	Collapse “Excellent”, “Very good”, “Good” and “Fair”

Domain	Item	Graph #	Recoding/Collapsing Logic
	Proportion of people who reported their health has gotten much better or somewhat better compared to 12 months ago	80	Collapse “Much better” and “Somewhat better”; Collapse “Much worse”, “Somewhat worse” and “About the same”
	Proportion of people who feel sad or depressed at least sometimes or often	84	Collapse “Often” and “Sometimes”; Collapse “Not often” and “Never, or almost never”
	Proportion of people who describe their hearing as poor (taking into account hearing aids, if any)	86	Collapse “Very good” and “Fair”
	Proportion of people who describe their vision as poor (taking into account glasses or contacts, if any)	87	Collapse “Very good” and “Fair”
Medications	Proportion of people who understand why they take their prescription medications and what they are for (if take or are supposed to take prescription medications)	90	Collapse “No” and “In-between, or some medications”
Rights and Respect	Proportion of people who feel that their paid support staff treat them with respect	91	Collapse “No, never or rarely” and “Some, or usually”
	Proportion of people who get asked permission before people enter their home/room (if in group setting)	92	Collapse “Sometimes, rarely or never” and “Usually, but not always”
	Proportion of people who have enough privacy in their home (if in group setting)	94	Collapse “Sometimes, rarely or never” and “Usually, but not always”
	Proportion of people who can use the phone privately whenever they want to (if in group setting)	96	Collapse “No, never or rarely” and “Usually”
Self-Direction of Care	Proportion of people who can choose or change what kind of services they get	100	Collapse “No” and “Sometimes, or some services”
	Proportion of people who can choose or change how often and when they get services	101	Collapse “No” and “Sometimes, or some services”
	Proportion of people who can change their paid support staff	102	Collapse “No” and “Sometimes, or some services”
Work	Proportion of people who would like a job (if not currently employed)	104	Collapse “Yes” and “Maybe, not sure”
	Proportion of people who would like to do volunteer work (if does not currently volunteer)	107	Collapse “Yes” and “Maybe, not sure”

Domain	Item	Graph #	Recoding/Collapsing Logic
Everyday Living	Proportion of people who generally need a lot or some assistance with everyday activities (Things like preparing meals, housework, shopping or taking their medications)	108	Collapse "A lot" and "Some"
	Proportion of people who generally need a lot or some assistance with self-care (Things like bathing, dressing, going to the bathroom, eating, or moving around their home)	110	Collapse "A lot" and "Some"
	Proportion of people who have access to healthy foods like fruits and vegetables when they want them	112	Collapse "No, never" and "Sometimes"
Affordability	Proportion of people who ever have to skip a meal due to financial worries	113	Collapse "Yes, often" and "Sometimes"
Control	Proportion of people who never feel in control of their life	115	Collapse "Yes, almost always, always" and "In-between, sometimes"

Appendix B: Un-Collapsed and Un-Weighted Data by Program and Setting

Demographic Tables

Table 1. Average age (reported for those under 90 years of age)

	Average Age	N
