Introduction

Established in 2015, National Core Indicators—Aging and Disabilities™ (NCI-AD™) is a voluntary effort by state aging and physical disability agencies to measure and track their performance using a standardized set of nationally validated measures. The effort is coordinated by Advancing States and Human Services Research Institute (HSRI). Learn more about our history [here](#).

In 2022-23 a total of 18 states participated in NCI-AD. Not all participating states do all surveys every year.

Adult Consumer Survey

The NCI-AD Adult Consumer Survey (ACS), is standardized survey conducted with a person receiving long term services and supports (LTSS) through state aging and physical disability systems. Surveys are conducted by trained surveyors through in-person, secure video meeting, or over-the-phone conversations with service participants. The main part of the survey contains subjective questions about how well services are supporting the person; these can only be answered by the person themselves. A subset of more objective questions may be answered by a proxy respondent if needed. In addition to the questions for service participants, the survey also collects background information on the person –demographic and service-related data – mainly from service agency records. In 2022-23, the survey included two state-optional modules:

Person-Centered Planning Module (state-optional). This is a state-optional series of questions that ask about the person-centered planning process, including the person’s experience developing the service plan and the service planning meeting. The following states conducted the Person-Centered Planning Module: AL, CO, DE, GA, IN, KS, KY, MN, MO, ND, NE, NJ, OH, OK, TN, WA, and WI.

Self-direction Module (state-optional). This state-optional module was added to the 2022-23 ACS. Questions in this section are asked only of those who are using a self-directed supports option and assess experiences specific to self-direction. The following states conducted the Self-direction module: AL, CO, DE, GA, IN, KS, KY, MI, MN, MO, ND, NE, NJ, OH, OK, TN, WA, and WI.

Ohio Sample

There is considerable variation in how states’ long-term services and supports (LTSS) programs serving older adults and adults with physical disabilities are organized, funded, and administered. The NCI-AD program allows states to include programs funded through Medicaid, the Older Americans Act, Program of All-Inclusive Care for the Elderly (PACE), state-only funds, and/or other state- and federal-blended funds. The NCI-AD project team works closely with each participating NCI-AD state to advise and track which LTSS program populations and sub-populations are included in the state’s sampling strategy, how that sample is designed and how many surveys are targeted for completion. See detailed information on state sample frames [here](#).

Table B. Classification of 2022-23 State programs

Program	Funding Source	Description of Program	Total Population Eligible for NCI-AD	Total Usable Surveys Collected	MoE (95%Confidence, 0.5 Distribution)	MoE (95%Confidence, 0.7 Distribution)
Ohio Home Care Waiver	Medicaid 1915(c) waiver	Participants are between the ages of 18-59; be determined to have a nursing facility-based level of care; require and agree to receive at least one waiver service monthly that is otherwise unavailable through another source; establish residency in a place that possesses a home, and community-based setting characteristics (i.e., not a group living arrangement subject to licensure); and have needs that can be safely met through the Ohio home care waiver.	7,227	385	5.0%	4.6%
PASSPORT Waiver	Medicaid 1915(c) waiver	This waiver program provides services in home and community	18,599	374	5.1%	4.6%

What is included in this report?

This report presents Ohio 2022-23 ACS demographics and outcomes results. Data are shown for the overall statewide average, broken out by program sampled, and include the weighted NCI-AD Average.

Please note: Extreme caution should be used when interpreting results where the number of valid responses is small. Each program's valid number of responses (valid Ns) is shown in every chart and table in this report. *To protect people's privacy **we do not show the data when 20 or fewer people from a state or within a program responded to a question, however their data are included in the overall state average.***

Presentation of Data

Data may be viewed as bar charts or in tables by clicking the appropriate tab for each outcome. Data presented in charts are “collapsed” meaning that data grouped by response options to what is considered to reflect a positive outcome and all other responses. Tables represent the un-collapsed data outcomes. All NCI-AD data are collapsed “yes” responses only, unless otherwise noted.

All state and NCI-AD averages throughout this report are “weighted” to account for any non-proportional sampling of programs and to “rebalance” the states’ sample sizes according to their populations of survey-eligible service recipients. *See more details on weighting in Part II of this report.*

Accessibility Statement

National Core Indicators strives to develop accessible resources to support equitable access to information about quality of services. While all charts in this report have been marked as decorative, the data from the charts is all represented in the tables which have been reviewed for accessibility. Should you require other accommodations to make this report accessible for you, please reach out to us at nci@nationalcoreindicators.org.
